Nemours is currently funded by the Centers for Disease Control and Prevention (CDC) under a six-year Cooperative Agreement (6U58DP004102-05-02) to support states in launching ECE learning collaboratives focused on obesity prevention. Funding for these materials and learning sessions was made possible by the CDC. The views expressed in written materials or publications, or by speakers and moderators do not necessarily reflect the official policies of the Department of Health and Human Services, nor does the mention of trade names, commercial practices, or organizations imply endorsement by the U.S. Government.
Welcome to Taking Steps to Healthy Success

An Early Care and Education Learning Collaborative (ECELC) to Promote Healthy Practices

Your Name:

Program:

My Contact for Technical Assistance:

Nemours and its dedicated partners welcome you to the National Early Care and Education Learning Collaboratives (ECELC) Project! Nemours developed the model to support child care providers’ efforts to help young children grow up healthy and tested it with large early care and education programs in Delaware. We are excited to see it in action in your state!

Thanks to the commitment and generous funding from the Centers for Disease Control and Prevention (CDC), we are able to work together to adapt this powerful model for healthy change to meet the unique needs of your state. We are excited to support your work to create a healthier environment in your early care and education program for your children, your families and your program staff.

A Collaborative is a community of learners that will connect you with others engaged in making healthy change. It will offer learning opportunities, increase knowledge, create networks of support, and equip you to engage your staff in the process of making healthy changes. Over one year, the Collaborative will meet five times, with technical assistance visits scheduled between sessions to provide information, an opportunity to share experiences, and a forum for raising questions.

This toolkit is your guide to making change. It contains resources, tools and information to help you make the best practice and policy decisions for your program. Video training and materials will help staff and families understand the importance of making healthy changes and give them the tools to support your work. Small group work with a Trainer, and opportunities to share challenges and successes with others going through the process of change will give you a network to rely on for support, information and ideas.

This is a working toolkit that we will add to at each session. We hope you find the Learning Session materials useful. Thank you for joining us in this exciting work to help kids grow up healthy!

Welcome to the Collaborative
Acknowledgements

Nemours gratefully acknowledges the valuable contributions of a wide variety of stakeholders committed to supporting children’s health and optimal development. We thank you all for helping to make our dream a reality.

Thanks to generous funding support from the Centers for Disease Control and Prevention (CDC), we are able to work collaboratively with states to adapt the model to meet their unique needs. We welcome the opportunity to collaborate and learn with leaders and providers in participating states.

On behalf of the early care and education providers who will participate in the ECELC, and the children and families they serve, we thank our partners in this effort:

Child Care Aware® of America
National Initiative for Children’s Healthcare Quality
Gretchen Swanson Center for Nutrition
American Academy of Pediatrics
National Association of Family Child Care
American Heart Association, Dr. Mary Story
Dr. Dianne Ward (University of North Carolina)
National Resource Center for Health and Safety in Child Care and Early Education
American Public Human Services Association
Association of State & Territorial Public Health Nutrition Directors
United States Breastfeeding Committee
Zero to Three

Special thanks to our Delaware Child Care Collaborative participants, who helped us develop, test and refine our original model. We learned so much from them, their children and families. Their commitment to promoting healthy eating and physical activity, their willingness to learn, their courage to change and their generosity in sharing their experiences continue to inspire us.

We are grateful to the Delaware Institute for Excellence in Early Childhood at the University of Delaware (DIEEC), our partner in implementing the second cohort of the Child Care Learning Collaboratives in Delaware, for their inspired collaboration.

The contribution of Elizabeth Walker, who guided the first collaborative in Delaware, is beyond measure. We are grateful to Elizabeth for sharing her vision, anchoring the collaborative in science and inspiring us all to change.

We thank the following individuals and organizations who contributed their expertise, materials and time to ensure success as we worked together to develop an empowering model for quality improvement in support of children’s health in child care settings:

Child Care Exchange and Videoactive Productions: Roger Neugebauer and Dan Huber
Delaware Child and Adult Care Food Program (CACFP): Beth Wetherbee and David Bowman
Delaware Office of Child Care Licensing: Patti Quinn
I am Moving, I am Learning: Linda Carson

Learning Session 3: Materials

Learning Session 3: Serving Meals Family-Style and Supporting Breastfeeding

Overview

Learning Session 3 provides a rationale for the role early care and education (ECE) providers play in helping make healthy changes. It explains family-style dining and breastfeeding best practices in the ECE setting. During this session, participants are expected to increase their knowledge, awareness and motivation to work towards healthy change. Key content includes information on:

- Best practices for family-style dining;
- Ways to support breastfeeding families in your program;
- Continuing the process of healthy change through an Action Plan;
- Developing action steps to support program staff and the program environment;
- Resources and strategies for overcoming challenges to meeting family style dining best practices and supporting breastfeeding; and
- Ways to support family-style dining and breastfeeding through program staff, family engagement, and program policies.

Post-session (Action Period)

Program Leadership Teams utilize the Leadership Team Guide to engage their program staff to:

- Complete the Learning Session 3 Group Discussion Worksheet;
- Implement steps identified in the “program staff” and “program environment” columns of the Action Plan Worksheet; and
- Collaborate with staff to continue documenting healthy changes made from Learning Session 2 to Learning Session 5 on their storyboard.
Sample Agenda

Objectives
At the end of the Learning Session, participants will:

1. Describe best practices for family-style dining and breastfeeding support and identify change opportunities within their program;
2. Define “I” messaging and effectively demonstrate the skill during a role-playing activity;
3. Have the information to continue the Action Plan and develop action steps for program staff and program environment; and
4. Continue to document and communicate the process of healthy changes through their storyboard.

Learning Session 3: Materials

Serving Meals Family-Style & Supporting Breastfeeding

Early Childhood Health Promotion and Obesity Prevention

National Early Care and Education Learning Collaboratives (ECELC) Project

Acknowledgements

A special thank you to:

- **Centers for Disease Control and Prevention (CDC)**
  - For generous funding support and expertise

- **Nemours**
  - For their expertise, materials, support, and time spent on the project’s implementation

- **Gretchen Swanson Center for Nutrition**
  - For the evaluation component of this national effort
Learning Session 3 Objectives

At the end of the Learning Session, participants will be able to:

1. Describe best practices for family-style dining and breastfeeding support and identify change opportunities within their program;
2. Have the information to continue the Action Plan, with focus on impacting program staff and the program environment; and
3. Continue to document and communicate the process of healthy change by adding to the storyboard.
LS2 Action Period

Part A: Family-Style Dining
Family-Style Dining

What is Family Style Dining?

- A meal service approach that helps ECE programs support children to have developmentally appropriate mealtime experiences and helps to prevent childhood obesity
- Involves children and adults sitting together to enjoy foods and beverages in a manner that supports children’s independence
- Foods and beverages are placed on the table where the children and adults sit together to share the meal
- Children are encouraged to serve themselves independently with adult help when needed.
Why is Family Style Dining Important?

- Enriches a child’s learning environment
- Gives children the opportunity to take an active role in their feeding
- Creates a unique opportunity for us to model healthy food choices and table manners

Characteristics of Family-Style Dining

- Children help set the table
- Child-size tables, utensils, and serving dishes are utilized
- Food is passed in small containers
- Beverages are served in small pitchers
- Children serve themselves
- Adults sit at the table with children and role model by eating the same foods
- Children engage in conversation
FSD Supports Child Development

- Small, large, oral motor development
  - Passing out plates, tipping a pitcher of milk, and lifting a serving spoon of food use a variety of motor skills
  - Learning to use serving utensils, such as tongs, allows children to develop fine motor skills
  - Children need to balance to stay in their chairs, which strengthens core muscles
  - Oral motor skills are developed when children learn to drink from a glass

FSD Supports Child Development

- Social Development
  - Provides teaching opportunities for sharing, turn taking, and table manners
  - Children learn empathy and how to recognize and respond to others’ needs
  - As children talk with their peers and adults at meals, they practice social etiquette behaviors, such as saying “please” and “thank you”, and learn the art of conversation and how important these are for a pleasant mealtime experience
  - Adult role modeling of both manners and conversation skills is fundamental to FSD
FSD Supports Child Development

- **Language Development**
  - Mealtime conversations develop children’s language and can create a language-rich environment
  - Using words and sentences describing the flavor, texture, color, or temperature of a food enriches children’s vocabulary
  - Talk about topics that interest the children in your program!

- **Emotional Development**
  - Can boost a child’s self confidence through trying new things and mastering new skills
  - Getting food from the serving bowl to their plate is a reason to celebrate
    - “I did it!” are important words for children to say
  - Waiting their turn for food to be passed around helps children practice self-regulation
  - Children learn independence when they help to set the table, serve themselves, and clear the table
Getting Children Ready for FSD

- To be successful with family style meal service, it’s important that children:
  - Learn and develop mealtime skills
  - Practice self-feeding

Child Size Equipment

- Developmentally appropriate equipment allows children to:
  - Develop and enhance fine motor skills to grasp, hold, and manipulate small objects and tools
  - Improve hand-eye coordination skills
Getting Staff Ready for FSD

- It’s important that staff are prepared to:
  - Encourage self-feeding practices
  - Arrange seating to support skills
  - Assess children’s mealtime skills
  - Integrate Meal Service Practice into other activities

Integrating Meal Service into Daily Activities

- Daily transitions and routines
- Dramatic play
- Small motor experiences
- Sand and water play
- Literacy and music/movement activities
Create a Mealtime Environment that Promotes Learning and Exploration

Phrases that Hinder
- “You have to eat that”
- “Do not leave the table until everything is finished”
- “Carli, look at Maria. She ate all of her bananas and you did not.”
- “You may not have seconds, we don’t have enough to give them to everyone.”
- “I’m going to tell your mom you weren’t a good eater today at school.”

Phrases that Help
- “These radishes are crunchy! What other vegetable is crunchy?”
- “This is a kiwi. It is sweet. What fruits do you like that are sweet?”
- “What should you do when your stomach is full from eating?”
- “Thank you for trying a new vegetable. It is ok that you did not like it”

Getting Your Program Ready for FSD

- Procure appropriate furniture and equipment
- Implement gradually
Discussion:

Are you ready for family-style dining?

Tips for Success

TIPS for FAMILY STYLE DINING SUCCESS

• Follow the Same Routine
• Adult Involvement is Key
• Be Prepared for Mistakes
• Make Clean-Up Easy
• Quiet Transition Activity
Mealtime Routine Sample Handout

Family Style Mealtime Routine

Mealtime Routine Sample
1. Call for home in children with family
2. Transition family, using
3. Clear table, using
4. Children sit at the table as seated
5. Teachers in seat set with children
6. Children and teachers adjust to position as allowed before serving

Family Style Mealtime Checklist

Mealtime Routine
- Teach family to be seated and ready at the designated time
- Assist family in passing and serving utensils
- Teach family in passing
- Serve family to make sure that family do not attempt to grab and are not too hot to pass
- Small hands, using one-piece plastic, large, and dish-handed family plastic serving spoons are used

Mealtime practices with children
- We eat together at the same time
- We work with children for sharing and helping
- We serve ourselves and pass food to each other
- We use smaller utensils
- Feeding food practices for children
- We use both hands
- Keep food off the table when serving
- Hold the bowl by the plate, line, keep fingers out of food

Family Style Practice Activities

Serving utensils practices (small group activities with a learning center in classroom)
- Practice with knives, large, and dish-handed family plastic serving spoons

Paying practices (set up water table or learning center in classroom)
- Practice with forks
- Practice with family for eating such as utensils
- Practice with water and playing with unusual glasses

Cleaning practices (small group play or small group activity)
- Practice clean up with sponge or cloth
- Practice with water and cleaning with table and floor
- Practice clean up of table and floor with water

Early Learning Standards

Physical Activity Break
Sesame Street Healthy Habits for Life Toolkit

Part B: Breastfeeding Support
Call to Action

“One of the most highly effective preventative measures a mother can take to protect the health of her infant and herself is to breastfeed. The decision to breastfeed is a personal one, and a mother should not be made to feel guilty if she cannot, or chooses not to breastfeed. The success rate among mothers who choose to breastfeed can be greatly improved through active support…”

**Action:** Ensure that all early care and education providers accommodate the needs of breastfeeding mothers and infants.

What Do You Know About Breastfeeding?

**True/False Activity**
Why is breastfeeding important?

- **Mother’s milk is best for babies.**
- Mother’s milk provides her baby exactly what is needed to grow and thrive
- Breastmilk changes over time to keep up with a baby’s changing nutrition and disease protection needs
- To date, over 30 components to breast milk have been identified, protecting babies from infections and illness.
- Breastfed babies benefit from “borrowing” their mother’s immune system at exactly the time when they are most susceptible to illnesses due to the immaturity of their own immune system.

Breastfed Babies are Healthier

- It’s no surprise then that breastfed babies are healthier
  - Less likely to grow up to be obese or suffer from conditions like diabetes and asthma
  - Get sick less often with things like diarrhea and ear infections. When they do get sick, it is usually not severe.
  - Breastfeeding helps protect babies against Sudden Infant Death Syndrome (SIDS).
- The physical contact involved in breastfeeding is also important to newborns. It can help them feel more secure, warm and comforted.
Why Do Moms Need Your Support?

- 81% of moms desire to breastfeed
- 79% of moms start breastfeeding
- 60% of moms do not meet their breastfeeding goals (frequency and/or duration)
- Returning to work is the primary reason for ending breastfeeding
- Shorter duration of breastfeeding if baby is in an early care and education environment

Breastfeeding Benefits Women

- Health Benefits
  - Type 2 diabetes
  - Breast and ovarian cancer
  - Postpartum depression
- Increased weight loss
- Attachment
- Convenience
- Savings
Breast Milk Can Save Your Program Money

- Breast milk is part of the CACFP meal pattern
  - It is reimbursable for infants if fed by the mother or child care provider
  - It’s free! No equipment to purchase
    - Cost effective for families as well
  - For children over 12 months, breast milk may be substituted for cow’s milk
    - Doctor’s note may be required

- Human milk is food
  - You do not need to store human milk in a separate refrigerator
  - You do not need to wear gloves to give a bottle of human milk or formula
  - Contact with human milk is not hazardous exposure

</table>
Breastfeeding Recommendations

- The American Academy of Pediatrics recommends:
  - Exclusive breastfeeding for about 6 months, followed by continued breastfeeding as complementary foods are introduced
  - Continuation of breastfeeding for at least 1 year
  - Continuation of breastfeeding beyond 1 year for as long as mutually desired by mother and infant

- Exclusive breastfeeding means an infant is given no other substances for food (e.g. no infant formula or water)

10 Steps to a Breastfeeding-Friendly Program

1. Update/change program policies
2. Conduct staff trainings
3. Communicate with families
4. Provide learning and play opportunities for children
5. Practice proper storage and labeling
6. Provide a dedicated space for nursing
7. Provide employee support
8. Create a feeding plan
9. Refer families to appropriate community programs
10. Continue to learn and provide updates to program staff
Breastfeeding-Friendly Child Care Centers Handout

Ten Steps for Breastfeeding-Friendly Child Care Centers

The following ten steps describe ways that child care centers can provide optimal support for breastfeeding families. Below each step are specific actions for support that idea.

Step 1: Teaching the importance of breastfeeding, educate parents on breastfeeding.

1. Teaching the importance of breastfeeding to parents.
2. Provide a written document for new parents explaining benefits.
3. Ask parents to discuss the benefits of breastfeeding with child care providers.
4. Encourage parents to breastfeed in public.

Step 2: Implementing policies that support breastfeeding.

1. Making it easy for parents to breastfeed by allowing them to do so in a private space.
2. Allowing parents to breastfeed while at work.

Step 3: Encouraging support for breastfeeding.

1. Providing support and education to parents and child care providers.
2. Encouraging parents to breastfeed in public.
3. Allowing parents to breastfeed while at work.

Step 4: Making it easy for parents to breastfeed by allowing them to do so in a private space.

1. Providing a written document for new parents explaining benefits.
2. Allowing parents to breastfeed while at work.
3. Encouraging parents to breastfeed in public.

Hunger Cues

- Doctors recommend that all babies be fed when they are hungry, rather than on a schedule

- Hunger Cues
  - Moving head side to side
  - Opening mouth and sticking out tongue
  - Puckering lips to suck
  - Rooting reflex

- Watch the baby, not the clock

- It is normal for young babies to eat only 2-3 ounces of milk in one sitting

- We want babies to learn that when they are hungry, they eat, and then they are full
  - Scheduled feeding disrupts this learning
Is Your Baby Hungry or Full?
Responsive Feeding Explained

The American Academy of Pediatrics (AAP) has resources to explain and promote responsive feeding including a video, infographic, and tip pages.

General Infant Feeding

- **Breastfed babies do not need solid food before 6 months**
  - Early solids replace breast milk, which should still be main source of food
  - Introduce solids when developmentally appropriate
- **Introduce solids at signs of readiness**
  - Sits with good head control
  - Opens mouth when food comes his/her way
  - Can move food from spoon to back of throat
- **Don’t feed cereal in a bottle**
  - It’s bad for teeth and will not help a baby sleep longer
- **Hold infants while feeding them**
  - Puts you in good position to see an infant signaling they are full
Cultural Views of Breastfeeding

- Many different cultures look at breastfeeding as a natural choice for feeding
- Many countries have banned the practice of giving free or subsidized formula to new mothers
- Accepting and understanding cultural differences allows staff to become culturally sensitive to those parents and families who decide to breastfeed
- Some cultures discourage breastfeeding because it ‘spoils’ babies and/or discourages babies from sleeping through the night

Cultural Competence

- Respect the individual
- Understand various cultural backgrounds
- Understand appropriate personal space and eye contact
How to Support Breastfeeding Mothers

Lunch
Part C: Overcoming Challenges to Meeting Family Style Dining Best Practices & Supporting Breastfeeding

Challenge: Time

- **Time demands**
  - It takes longer to serve and eat meals family-style

- Solution #1: Delegate tasks to children
- Solution #2: Teach children meal and snack time routines
- Solution #3: Adjust the daily schedule
Challenges: Messiness

- Messiness
  - Family style eating can be seen as messy or unsanitary

- Solution #1: Be Prepared for Messes
- Solution #2: Adopt strategies to minimize and avoid contamination of food.
- Solution #3: Start Small

Challenges: Motor Skills

- Motor Skill Level Differences
  - Some children will need more help serving themselves than others

- Solution #1: Give children lots of learning activities to help them develop motor skills needed for family-style dining
- Solution #2: Use age-appropriate eating equipment
- Solution #3: Designate adult learners at every table
- Solution #4: Use a Buddy System
Tips for Dealing with Messes

Family Style Meals: Tips for Dealing with Messes

This video comes from the University of Nebraska-Lincoln

Challenge: Nutritional Concerns

- **Nutritional Concerns**
  - You may be concerned that children will not eat well if allowed to serve themselves

- **Solution:** Provide positive guidance to children.
Challenge: Lack of Staff Motivation

- Lack of Staff Motivation
  - You may be hesitant to make the switch to family style dining for a variety of reasons

- Solution: Learn about family style dining before adopting it into everyday practice

Challenge: Is it against the rules?

- Isn’t it against the rules?
  - I participate in my state’s food program. I don’t think I’m allowed to do some of the family-style dining elements.

- Solution #1: Lunch box kids can practice family style dining
- Solution #2: State Food Programs DO support family-style dining
Putting It All Together

Challenge: Space Constraints

- **Space constraints**
  - You may not have a whole room to set aside for breastfeeding or may be unsure of what is needed for a lactation room.

- Solution #1: Convert a corner or private space into a breastfeeding station
- Solution #2: Learn more about what breastfeeding mothers need in that space.
Challenge: How to Support?

- **Unsure How to Support Breastfeeding**
  - You may feel like you do not have the knowledge and training to provide breastfeeding support.

- **Solution:** Find educational materials and trainings about breastfeeding

---

Challenge: Lack of knowledge about available support

- **Parents are Unaware of Breastfeeding Support Offered**
  - Mothers may not use available resources because they do not know they exist or are unsure how welcoming you are to breastfeeding.

- **Solution #1:** Create a written breastfeeding policy for your child care center or home.
- **Solution #2:** Become a valuable resource for your mothers
Part D: Facilitating Change in Your Program

The Social Ecological Model

Sample Family-Style Dining Policies

- At ABC Child Care, we support family-style dining by:
  - Role-modeling positive healthy eating behaviors in the presence of children
  - Sitting with children at the table and eating the same meals and snacks
  - Encouraging children to try developmentally-appropriate servings of new foods
  - Providing child-size tables, utensils, and serving dishes at mealtime
  - Providing opportunities outside of mealtime to strengthen pouring and scooping skills that can be utilized during family-style dining

Sample Breastfeeding Support Policies

- At ABC Child Care, we support breastfeeding and infant feeding by:
  - Providing a clean, welcoming place for mothers to breastfeed or express their milk
  - Offering breastfeeding promotional materials that are culturally appropriate
  - Providing a refrigerator for the storage of expressed milk
  - Ensuring all caregivers/teachers feed infants on cue unless the parent/guardian and the child’s primary care provider give written instructions otherwise
  - Providing professional development trainings to staff on supporting breastfeeding at least twice per year
The ABC’s of a Healthy Me!

Serving Meals Family-Style & Supporting Breastfeeding
Continue Action Plan & Storyboard

Reducing Screen Time & Celebrating Success
Continuing the process of change

Nurturing Healthy Eaters & Providing Healthy Beverages
Action Plan

Getting Kids Moving
Continue Action Plan & Storyboard

*Go NAP SACC is a Nutrition and Physical Activity Self Assessment for Child Care for ECE settings comparing their current practices with a set of best practices.

Technical Assistance Groups
Action Plan
Facilitating Change in Your Program: LS3 Action Period

- **Facilitated by the program Leadership Team**
  - Training for program staff
  - Mini-version of the Learning Session that the Leadership Team attended

- **Opportunity to:**
  - Complete the *Learning Session 3 Group Discussion Worksheet*
  - Implement action steps identified on their Action Plan for program staff and the program environment
  - Collaborate with program staff to continue creating your storyboard demonstrating what area(s) the program improved

- **Trainers provide technical assistance (TA)**

---

Creating a Storyboard

- **Programs will express their story of change by:**
  - Describing what change(s) were made and how they did it
  - Sharing who was involved in the process
  - Explaining accomplishments and challenges faced
  - Sharing photos of the implementation process
  - Describing how participants reacted to the change(s)
  - Outlining any program policies that were updated as a result
  - Explaining the next steps they will take to sustain the change(s)
Physical Activity Break

Part E: Extending Your Learning: Staff, Families and Program Policies
Family-Style Dining at Home

- Encourage families to practices family-style dining at home
- You can promote family-style dining by:
  - Offering special days that parents can participate in eating family-style (Mother’s/Father’s Day Breakfast, Back to School Night, etc.)
  - Sending home easy/quick recipes that allow less time for cooking and more time for eating together at the table
  - Taking photos of children eating family-style at the program and send home a conversation starter for ‘table talk’

Feeding Best Practices for Children

- Serve meals family-style
- Encourage self-feeding
- Eat when seated at a table
- Use appropriate serving sizes
  - Serve more only if the child is still hungry
  - Children will eat what they need
- Engage children in mealtime prep and cleanup
- Serve familiar and new foods
- Encourage children to try new foods, don’t force
- Do not use food as punishment or reward
- Integrate nutrition experiences for children in to program activities
Support mothers in breastfeeding as they return to work

- 80% of mothers desire to breastfeed, but 60% are unable to meet their breastfeeding goals
- Returning to work is the primary reason mothers end breastfeeding early
- Important steps to supporting nursing mothers:
  - Talk with the mother to begin to understand her ideas and goals for breastfeeding.
  - Reassure breastfeeding moms that they are doing the best thing for their baby.
  - Encourage them to breastfeed as long as possible.

Advocating for Breastfeeding

- Breastfeeding is more than a lifestyle choice, it’s a public health issue
- Benefits for employers
  - Moms miss fewer days of work because child isn’t sick as often.
- Benefits for society
  - Decreased abuse and neglect rates for mothers who breastfeed.
  - If 90% of mothers breastfed for 6 months:
    - 1,000 infant deaths could be prevented
    - U.S. could save $13 billion
Breastfeeding at Work

- Affordable Care Act requires support of hourly employees
  - Insurance benefits may cover the cost of breastfeeding equipment, such as breast pumps
- If mothers want to breastfeed upon return to work, they should have a:
  - Reasonable break time
  - Private space
  - A place to store their pumped milk
  - Work support system

Check-Out

Trainer Contact Information
Mealtime Routine Sample

1. Call for helpers - children with daily jobs.
2. Transition activity – song.
4. Children sit at the table as food is placed.
5. Teachers sit and eat with children.
7. Transition – children choose quiet books or puzzles as others finish eating.

Family-Style Mealtime Checklist

Mealtime Routine

- Teachers’ routine allows for food to be prepared and ready at the designated mealtime.

Appropriate size bowls and serving utensils

- Food is served in bowls of appropriate size that children can lift and pass.
- Serving bowls are made of materials that do not conduct heat and are not too hot to pass.
- Small size scoops, one-piece plastic tongs, and short-handled hard plastic serving spoons are used.

Mealtime expectations to review with children

- We eat together at the table.
- We all come to the table at the same time.
- We wait until everyone is ready before we begin.
- We serve ourselves and pass food to each other.
- We use inside voices.

Passing food practices for children

- Pass with both hands.
- Keep food over the table when passing it.
- Hold the bowl by the sides (to keep fingers out food).

Family-Style Practice Activities

Serving utensils practice (small group activity or set up a learning center in classroom)

- Practice with scoops, tongs, and short-handled hard plastic serving spoons.

Pouring practice (set up water table or learning center in classroom)

- Pretend practice.
- Practice with dry liquid such as sand or beans.
- Practice with water and pouring into child-size cups.

Cleanup practice (dramatic play or a small group activity)

- Pretend cleanup with sponge or cloth.
- Pretend floor cleanup with mini-mop or cloth.
- Practice cleanup of table and floor with water.

## What Do You Know About Breastfeeding?

Ten Steps to Breastfeeding-Friendly Child Care

The following Ten Steps describe ways that child care centers can provide optimal support for breastfeeding families. Below each step are specific actions to support that step.

**Step 1. Make a commitment to the importance of breastfeeding, especially exclusive breastfeeding, and share this commitment with fellow staff.**

1.1 Our center has a written policy for promoting and supporting breastfeeding, and it is regularly communicated to our staff and families.
1.2 Staff evaluations document a review of breastfeeding support activities.
1.3 Our center’s breastfeeding support is part of our discussion with all potential families.

**Step 2. Train all staff in the skills to support and promote optimal infant and young child feeding.**

2.1 All staff at our center receive training on age-appropriate infant feeding practices, including proper storage and handling of human milk.
2.2 All staff at our center receive training on recognizing infant hunger cues and feeding in response to these cues.
2.3 All staff at our center receive training on the risks and benefits of different infant feeding options.
2.4 All staff at our center receive training in breastfeeding protection, promotion, and support, including support of exclusive breastfeeding.

**Step 3. Inform women and families about the importance of breastfeeding.**

3.1 We provide all our families with our written policy for promoting and supporting breastfeeding.
3.2 Culturally appropriate educational materials on breastfeeding, and on the risks and benefits of different feeding options are displayed in several areas.
3.3 Culturally appropriate educational materials on breastfeeding, and on the risks and benefits of different infant feeding options are actively distributed to the families we serve.

**Step 4. Provide learning and play opportunities which normalize breastfeeding for children.**

4.1 We provide toys and books that illustrate nursing animals and babies, for children of all ages.
4.2 We discuss interactions between mothers and babies with children of all ages, including how they feed.

**Step 5. Ensure that all breastfeeding families we serve are able to store and label milk properly for child care center use.**

5.1 We provide sufficient refrigerator and freezer space to accommodate all of our breastfeeding families’ storage needs.
5.2 We instruct all breastfeeding families on the proper way to store and label human milk for child care center use, and all milk at our center is properly labeled.
5.3 We discuss with all families how expressed milk will be handled at our child care center.

6.1 We actively invite breastfeeding mothers to come to the center to nurse their babies while under our care.
6.2 There is a clean and comfortable place in our center, other than a bathroom, for mothers to sit and nurse their babies, or pump (express) milk if desired.
6.3 Our center displays posters and distributes materials, including photos reflecting the families we serve, that show our support of breastfeeding and demonstrate best practices.

Step 7. Support breastfeeding employees.

7.1 Breastfeeding employees are given appropriate breaks so that they may express milk and/or nurse their babies as needed.
7.2 The center provides a clean, comfortable, private place for employees to pump/express milk and/or nurse their babies as needed.

Step 8. Ensure that each infant has a feeding plan that supports best feeding practices.

8.1 We develop a written feeding plan with each new family at our center, which is accessible and regularly updated.
8.2 Breastfeeding support is explicitly included in all feeding plans, as part of the standard form.
8.3 We respond to infants’ hunger cues rather than feeding on a schedule, and we encourage mothers to feed this way at home.
8.4 We encourage mothers to introduce solid foods at a developmentally appropriate time.

Step 9. Contact and coordinate with local skilled breastfeeding support and actively refer.

9.1 Our center has a list of community breastfeeding resources to be used for referral.
9.2 Our center regularly refers families to community breastfeeding resources.
9.3 Our center tracks community referrals and follows up with families as needed.

Step 10. Continue updating and learning about protection, promotion, and support of breastfeeding.

10.1 Our center has up-to-date materials on hand that include information on breastfeeding and human milk feeding.
10.2 Each staff member receives at least one hour per year of continuing education on human milk feeding and breastfeeding support.
10.3 Our center provides a resource list, for our staff, of local lactation consultants and community providers who can answer breastfeeding and human milk feeding questions.
Breastfeeding and Early Care and Education
Increasing support for breastfeeding families

Breastfeeding helps protect children against obesity, among other important health benefits. The American Academy of Pediatrics recommends exclusive breastfeeding for about the first six months and continued breastfeeding for at least the first year as foods are introduced. Unfortunately, in 2009 only 47% of mothers breastfed at six months and 26% at 12 months of age.

One factor affecting breastfeeding duration is that many mothers are away from their children during the day and may not receive the support they need to continue breastfeeding. In 2007, 60% of women with children under age 3 were in the labor force. As a result, many children are cared for by persons other than their parents.

Early care and education (ECE) providers and teachers influence the lives and health of the families they serve and have an important role in supporting breastfeeding mothers. ECE programs, centers and family homes alike can support breastfeeding mothers by ensuring that staff members are well-trained to meet national recommendations for supporting breastfeeding mothers. Support may include allowing mothers to breastfeed at the facility, feeding a mother’s pumped breast milk to her baby, thawing and preparing bottles of pumped milk as needed and keeping extra breast milk in a freezer in case they run out.

As of December 2011, only 6 states’ licensing regulations contained language that meets national recommendations for encouraging and supporting breastfeeding and the feeding of breast milk (AZ, CA, DE, MS, NC, VT).

Examples of state efforts to increase support for breastfeeding women in ECE environments:

Arizona’s Empower Pack Program is a resource for ECE providers to help children to make healthy choices related to nutrition, physical activity, and tobacco. The program includes a self-assessment, a sample breastfeeding policy, and a video on how to support and work with breastfeeding mothers (http://azdhs.gov/empowerpack/).

The Mississippi Department of Health WIC program has developed a training curriculum for ECE providers entitled How to Support a Breastfeeding Mother: A Guide for the Childcare Center. The curriculum
incorporates guidelines for providers on how to support breastfeeding mothers as well as guidelines for the storage and handling of expressed milk (http://www.dshs.state.tx.us/wichd/bf/childcare.shtm).

The Utah Department of Health’s Nutrition, Physical Activity and Nutrition Program provides an online TOP Star Training, comprised of six workshops about preventing childhood overweight. This training is approved for professional development credit: 5 hours of Licensing Credit, and Career Ladder Credit in Health and Safety for child care providers in the state. Training Module 6, How to Support a Breastfeeding Mother: A Guide for Childcare Providers, provides ECE directors and staff accurate information and resources so they can best support breastfeeding mothers whose babies are in their care.

The New York State Department of Health’s Child and Adult Care Food Program (CACFP) recognizes ECE centers and family day care homes that participate in CACFP and support breastfeeding families with Breastfeeding Friendly certificates. A website provides ECE centers and family day care homes with self-assessment to apply for this designation, and lists the breastfeeding friendly centers and homes: (http://www.health.ny.gov/prevention/nutrition/cacfp/breastfeedingspon.htm).

The Wake County Breastfeeding-Friendly Child Care Initiative (BFCC) supports breastfeeding in ECE centers serving low-income families through collaboration between the Carolina Global Breastfeeding Institute and the Wake County Child Care Health Consultants and Wake County SmartStart. Activities include identifying the knowledge, attitudes, and practices that support breastfeeding among ECE center staff, mandatory trainings for ECE providers, and a toolkit that includes tools and materials for both providers and breastfeeding families (http://cgbi.sph.unc.edu/take-action/toolkits/259).

The Wisconsin Department of Health Services developed the Ten Steps to Breastfeeding Friendly Child Care Centers, a resource kit to help ECE centers and family homes promote breastfeeding and ensure that they support mothers to be able to breastfeed. http://www.dhs.wisconsin.gov/publications/P0/P00022.pdf

Find out more at Let’s Move! Child Care http://healthykidshealthyfuture.com/

Setting and enforcing ECE standards is the responsibility of individual states and territories, although some local jurisdictions can set standards. The 3rd edition of Caring for our Children: National Health and Safety Performance Standards, the gold standard for ECE, provides recommendations on how childcare providers can support breastfeeding families.

References to non-federal organizations are provided solely as a service to the audience. These references do not constitute an endorsement of these organizations or their programs and policies by CDC or the Federal Government, and none should be inferred.
Learning Session 3: Serving Meals Family-Style and Supporting Breastfeeding

Leadership Team Guide

Name: ___________________________________________ Program: ___________________________________________

**Learning Session 3 Action Period:**

Complete before Learning Session 4 (LS4):

- Come together as a whole program to implement changes in the areas of program staff and program environment;
- Use the *Sesame Street Healthy Habits for Life* toolkit to complete the *Learning Session 3 Group Discussion Worksheet,* and
- Collaborate with program staff to continue to document and communicate the process of healthy changes on the storyboard.
- Bring the following items back to Learning Session 4:
  - *Learning Session 3: Group Discussion Worksheet,* and
  - *Action Plan Worksheet*

**Setting the stage**

**Supplies:**

- *Learning Session 3: Group Discussion Worksheet;*
- *Sesame Street Healthy Habits for Life* toolkit;
- *Action Plan Worksheet;*
- Pens or pencils for writing; and
- Rewards for participation (optional).

**Environment**

Tips to remember as a facilitator:

- Be organized. Bring all needed materials, and plan ahead so you can ensure everyone in your program will get the most out of this experience;
- Be engaging. Smile, look people in the eyes, and be positive while helping them to learn;
- Share ideas and be open to suggestions. During discussions, encourage staff to participate, listen carefully to their ideas, record them on chart paper and be willing to share your ideas too; and
- Have fun! Make this a time to brainstorm, build your team and learn how to work together to make your program better.
Engaging staff in discussion

To help engage staff in discussion, try these discussion prompts and ideas:

- Encourage staff to take the lead on sharing their ideas;
- Validate their ideas by recording them on chart paper, responding positively, or offering rewards; and
- Try to use open-ended questions to encourage conversation:
  - Do you think the *Sesame Street Healthy Habits for Life* toolkit can be used in your classroom?
  - How can you further engage program staff to implement change in your program related to family-style dining and breastfeeding support?
  - What changes can you make in your program environment to support family-style dining and breastfeeding?
Task 1: Action Plan

What is Our Role in Making Healthy Changes?

Review the Action Plan and discuss the next steps:

- Using the *Action Plan Worksheet*, review the “program staff” and “program environment” columns;
- Using the *Action Plan Worksheet*, complete the “program staff” and “program environment” columns if you did not finish drafting the action steps at the Learning Session;
- Work with the program staff to implement changes in the areas of program staff and program environment; and
- Continue to document and communicate the process of healthy changes on the storyboard.
### Sample Action Plan Worksheet

**Sample Goal:** Children eat healthy food in the program.

Task 2: Learning Session 3 Group Discussion Worksheet

Remind staff about *Taking Steps to Healthy Success* and give them an update on your program’s progress at Learning Session 3. Let them know that their involvement is the key to making healthy changes! Tell them that you will work together to implement healthy changes in the program.

**NOTE:** Listen to the staff during this training and try to note any ideas they mention that will support the Action Plan or new ideas that you think will be easy to include in the plan.

**Sesame Street Healthy Habits for Life toolkit**

- Introduce the *Sesame Street Healthy Habits for Life* toolkit and inform participants that this is a multi-media resource kit they can use in their classrooms. The toolkit includes:
  - Bilingual (English and Spanish) format;
  - Recommendations to support building healthy habits;
  - Games and activities designed to reach preschool children most at risk or in underserved communities; and
  - Ideas for newsletters and activities to encourage family engagement
- Distribute your state’s Early Learning Standards.
- Conduct the “Hokey Pokey Muscles and Bones” activity; and
- Designate one person from the Leadership Team to record staff thoughts and feedback to the questions below.

1. Identify three Early Learning Standards that the activity supports:

   ____________________________________________________________________________

   ____________________________________________________________________________

   ____________________________________________________________________________

2. Think about the age-group in your classroom. How would you use this activity with them? What materials would you need?

   ____________________________________________________________________________

   ____________________________________________________________________________

3. List one way you could use this activity in your lesson plans or in your regular daily routine.

   ____________________________________________________________________________

4. How could you involve families in this activity?

   ____________________________________________________________________________

   ____________________________________________________________________________
