Learning Session 5: Reducing Screen Time & Celebrating Success

Overview

Learning Session 5 provides rationale for the role family child care (FCC) providers play in making healthy changes through reducing screen time. It builds on the experiences, knowledge, and action planning of the previous Learning Sessions in order to equip providers to continue the process of change. Providers will share their process of change through storyboard presentations.

Key content includes information on

- Best practices and strategies for reducing screen time;
- Celebration of strengths and successes through storyboard presentations;
- Action planning and continuing the process of change; and
- National, State, and Local support for FCC providers.

Post-session (Action Period)

The family child care provider will:

- Continue the action planning process; and
- Identify and act on new ways to continue to support healthy changes.

Objectives

At the end of the Learning Session, providers will be able to:

1. Describe best practices for reducing screen time and identify change opportunities within their program;
2. Use storyboard presentations to show at least one change within their program that supported healthy eating, physical activity, screen time, and breastfeeding support;
3. Be able to identify local organizations/agencies that support family child care providers; and
4. Be prepared to continue their Action Plan to support implementation of best practices for healthy eating, physical activity, screen time, and breastfeeding support in their program.
