Nemours is currently funded by the Centers for Disease Control and Prevention (CDC) under a five-year Cooperative Agreement (1U58DP004102) to support states in launching ECE learning collaboratives focused on obesity prevention. Funding for these materials and learning sessions was made possible by the CDC. The views expressed in written materials or publications, or by speakers and moderators do not necessarily reflect the official policies of the Department of Health and Human Services, nor does the mention of trade names, commercial practices, or organizations imply endorsement by the U.S. Government.

Welcome to the National Early Care and Education Learning Collaborative

Nemours and its dedicated state partners welcome you to the National Early Care and Education Learning Collaboratives (ECELC) Project!

Thanks to the commitment and generous funding from the Centers for Disease Control and Prevention (CDC), we are able to work together to adapt the Taking Steps to Healthy Success (TSHS) Curriculum within a Learning Collaborative Model to implement healthy change in the Early Care and Education (ECE) programs in your state.

Nemours, in collaboration with the Gretchen Swanson Center for Nutrition (GSCN), is working to support the implementation and evaluation of the National ECELC Project. In addition to the CDC and GSCN, we want to thank our state partners for overseeing and ensuring smooth implementation of the National ECELC Project on the ground level.

This Implementation Guide is designed to support you as you plan, prepare and deliver five Learning Sessions for Family Child Care providers (FCC) participating in your Collaborative(s). The Learning Sessions provide a structured approach for training Family Child Care providers to facilitate change in their programs. There is room for customizing presentations and activities based on your state/locality ECE initiatives, interests, and/or areas of concern specific to your community.

Over 12 months, Family Child Care providers participating in each Collaborative will attend five in-person Learning Sessions. After each Learning Session, providers will use information from the Learning Sessions to take part in implementing healthful change through: program assessment, action planning, implementation of the action plan, documentation of the process, and sharing their stories. Technical assistance (TA) visits after each session provide information, guidance, and support to help providers successfully implement change.

This Implementation Guide provides an overview of the implementation process and answers frequently asked questions related to both content and quality improvement. We hope it is a useful tool as you lead Family Child Care providers on a journey of discovery to improve the health and wellness of children and families.

We encourage you to take some time to look through this resource. Please reach out to us at any time for support, ideas or just someone to listen to successes or challenges. To contact us, please refer to the Who to Call for Help chart on the following page.
## Who to Call for Help

<tr>
<td><strong>Facilitator</strong></td>
<td>Designated person or people from the Leadership Team to lead the Action Period component with their ECE program staff.</td>
</tr>
<tr>
<td><strong>Go NAP SACC</strong></td>
<td>Nutrition and Physical Activity Self Assessment for Child Care self-assessment for ECE settings comparing their current practices with a set of best practices.</td>
</tr>
<tr>
<td><strong>Learning Collaborative</strong></td>
<td>A learning community made up of approximately 20-25 ECE programs to increase their knowledge, create networks of support, and equip programs to work together to make healthy policy and practice changes aligned with <em>Let's Move!</em> Child Care.</td>
</tr>
<tr>
<td><strong>Learning Session</strong></td>
<td>Five in-person, active Learning Sessions focused on the relationship of nutrition, breastfeeding support, physical activity, and screen time to children's health also provide opportunities to build collegial relationships, develop leadership, increase collaboration, plan for and implement healthy change.</td>
</tr>
<tr>
<td><strong>Let's Move! Child Care (LMCC)</strong></td>
<td>Part of the national <em>Let's Move!</em> Campaign, initiated by U.S. First Lady Michelle Obama, focused on improving practices in early childhood settings to solve the problem of obesity within a generation.</td>
</tr>
<tr>
<td><strong>National Early Care and Education Learning Collaboratives Project (ECELC)</strong></td>
<td>Name of this project funded by the Centers for Disease Control and Prevention and managed by Nemours to support ECE programs as they improve their practices and policies for nutrition, breastfeeding support, physical activity, and screen time.</td>
</tr>
<tr>
<td><strong>Program</strong></td>
<td>An intervention or service that has a design, staff, curriculum or approach, and a funding source.</td>
</tr>
<tr>
<td><strong>Resources</strong></td>
<td>The tools, materials, and resources aligning with <em>Let's Move!</em> Child Care and the Preventing Childhood Obesity, 3rd Edition standards that are available to participating ECE programs as they implement the ECELC.</td>
</tr>
<tr>
<td><strong>State Implementing Partner</strong></td>
<td>An agency/organization subcontracted with Nemours to handle the administration of the ECELC in a particular state.</td>
</tr>
<tr>
<td><strong>State Project Coordinator (Project Coordinator/PC)</strong></td>
<td>Administers the ECELC and provides overall coordination of the Learning Collaborative logistics in the state, with leadership responsibility for technical support, communication efforts, recruitment and support of Trainers and participating programs.</td>
</tr>
<tr>
<td><strong>Taking Steps to Healthy Success (Curriculum)</strong></td>
<td>ECELC curriculum, structured around 5 in-person learning sessions for Leadership Teams and on-site Action Period sessions to engage all program staff, designed to guide Leadership Teams and their programs through the process of making healthy changes aligned with best practices.</td>
</tr>
<tr>
<td><strong>Teacher</strong></td>
<td>An individual responsible for the primary education of a group of children.</td>
</tr>
<tr>
<td><strong>Technical Assistance (TA)</strong></td>
<td>Encouragement, support, information and resources provided by the Trainer(s) to help Leadership Teams facilitate training of program staff and develop and implement action plans for healthy change.</td>
</tr>
<tr>
<td><strong>Trainer(s)</strong></td>
<td>Individuals responsible for implementing 5 on-site Learning Collaborative sessions and providing ongoing technical assistance to participating ECE programs.</td>
</tr>
</tbody>
</table>
Section 1.1 - Introduction to the Early Care and Education Learning Collaborative

What is a Learning Collaborative?
A Learning Collaborative brings together diverse Family Child Care providers to accomplish a common goal: making their programs healthier. Participants attend a series of Learning Sessions and work together over a period of time to test, share and implement improvement strategies. The National Early Care and Education Learning Collaborative (ECELC) is an intervention designed to promote positive changes in healthy eating, healthy beverages, physical activity, screen time, and breastfeeding support policies, practices and environments in ECE settings. The Learning Collaborative uses the following resources to guide the process of healthy change:

- *Preventing Childhood Obesity in Early Care and Education Programs (2nd Edition)*;
- Selected standards from *Caring for Our Children (3rd Edition)*; and
- The goals of *Let’s Move! Child Care (LMCC)*.

A Learning Collaborative uses an empowerment model designed to support the growth of leadership, collaboration and confidence of ECE providers as they learn, change, grow and become champions for children’s health, development and learning.

Why is this model powerful?
The Learning Collaborative model brings together ECE teams to make program-level, sustainable improvements that address childhood obesity. The Collaborative Model is powerful because it:

- Brings together a community of learners;
- Creates a network of shared ideas and mutual support;
- Provides access to high-quality resources for quality improvement;
- Offers opportunities to build important skills: implementation of best practices, nurturing a collaborative and productive program team leadership training; and
- Supports long-term sustainability by engaging Family Child Care programs and families as partners in support of children’s health, development and well-being.

General framework and ECELC roles
Each Learning Collaborative is made up of approximately 20-25 FCC programs. Each FCC provider will attend five active, in-person, half-day Learning Sessions. The Learning Sessions, which State Project Coordinators (PCs) organize and Trainers facilitate, are around eight weeks apart over the course of 12 months. The major tasks of PCs include bringing together partners to coordinate state-wide efforts, serving as the technical expert for the project, recruiting and retaining FCC programs and supporting Trainers. PCs will organize a “Train the Trainer” session for Trainers in order to review scripts and materials for each Learning Session, Action Period process, expectations for site visits after each Learning Session and answer any questions Trainers may have. The team of Trainers for each Collaborative will facilitate Learning Sessions, and provide on-going technical assistance (TA) to participating FCC providers during the Action Period after Learning Sessions. The Action Period involves using new resources and completing specific action tasks related to making healthy change before the next Learning Session.

---

1 Providers include teachers, teacher aides, caregivers, and family child care providers.
2 See Part 3 - Planning and Timelines for your Collaborative for more information on this.
Section 1.2 – National ECELC Goals and Framework

What are the initial goals?
The goals of the National ECELC are to improve FCC environments through the implementation of policies and practices that impact the health and status of children by:

- Implementing best practices for healthy nutrition into program practice and policy;
- Increasing access to daily physical activity, both structured and unstructured and in indoor and outdoor settings;
- Eliminating or placing limits on screen time;
- Supporting breastfeeding; and
- Engaging families as partners in supporting children’s optimal development and acquisition of healthy habits.

Four components of the collaborative framework

1. **FCC providers meet in five structured, active, in-person Learning Sessions**
   Five Learning Sessions over the course of 12 months provide education about the relationship of healthy nutrition, physical activity, reduced screen time, and breastfeeding support to children’s health; the unique and powerful role of providers; the process of change; and the potential of partnerships with families to sustain change. In addition to increasing knowledge, participation in the Learning Sessions offers opportunities for skill building, small group work, and collaboration with an expanded network of colleagues to share ideas and concerns.

2. **After each session, FCC providers complete the Action Period tasks**
   The purpose of the Action Period is to enable the provider to reflect on information learned, assess and evaluate their current program practices, and potentially engage any staff and the families in an action planning process leading to healthy change(s). There are three main components to the Action Period: Assessment, an Action Plan, and a Storyboard.
   1. **Assessment:** Two assessment tools, the LMCC Quiz and Go NAP SACC (Nutrition and Physical Activity Self-Assessment for Family Child Care), are used pre- and post-test as educational, planning, and evaluation tools for programs.
   2. **Action Plans:** As part of the Action Period, FCC providers develop an action plan; to make healthy changes, targeting improvements suggested by their growing knowledge and experience, in response to the self-assessment results.
   3. **Storyboard:** To document the process of change, providers create and present a storyboard that corresponds to their Action Plan. The storyboard is used to share their experiences, both challenges and successes, with colleagues, families, staff, and the children under their care. Often, the storyboard generates ideas of healthy change for other FCC providers.

3. **Technical Assistance (TA)**
   TA is provided to participating FCC providers after Learning Sessions to provide information, resources, and support in moving towards healthy change. Ideally, the TA offered to providers is provided by the same Trainers that facilitate the in-person Learning Sessions. TA is documented and tracked for evaluation purposes.
4. Evaluation

In collaboration with the Gretchen Swanson Center for Nutrition (GSCN), the National ECELC Project is being evaluated through a number of activities and instruments over the course of the project. A number of different measures are utilized to gather information and data, including, but not limited to the following:

- **Let’s Move! Child Care Registration and Quiz (Pre and Post):** A quiz allowing providers to see which LMCC best practices (in the areas of food, beverages, physical activity, screen time, and infant feeding) have been implemented at the beginning and end of their participation in the Learning Collaborative.

- **Nutrition and Physical Activity Self-Assessment for Family Child Care (Go NAP SACC – Pre and Post):** A self-assessment (evaluating breastfeeding and infant feeding, child nutrition, infant and child physical activity, outdoor play and learning, and screen time) that allows providers to rate their strengths, as well as improvement areas, and to use this information to plan for healthy change. Similar to the LMCC Quiz, this instrument is utilized in the beginning and end of a provider’s participation in the Learning Collaborative.

Section 1.3 - Flexibility vs. Fidelity

**Flexibility**

*Taking Steps to Healthy Success (TSHS)* is a flexible curriculum that can showcase state initiatives, align with important policy initiatives or support the development of a comprehensive early childhood system. We hope you will find opportunities to make this TSHS training more relevant to your ECE providers by using it to increase interest and understanding of state messages and initiatives. Please share ideas you would like to explore with your PC.

Several PowerPoint (PPT) presentations refer to national or state data. We encourage you to adapt the Learning Sessions to incorporate data that is relevant to your programs by including specific policies, statistics, health initiatives and messages that are important to the locality where the training is being conducted.

There is also a lot of flexibility when planning movement and transition activities. The activities in each session can be drawn from materials that ECE programs will receive or from the *Nutrition and Movement Activity Book*, a collection of healthy nutrition and exercise activities.

As you become more familiar with the content of the Learning Sessions, you may want to add ideas, emphasize some points more than others, or even change the way the materials are presented. For example, one state team discussed setting up staff wellness information and resources that were presented as a PPT presentation as an interactive carousel activity that participants could rotate through, exploring and discussing options, barriers and solutions with colleagues.

We hope you will take this content and make it engaging for your providers! Please share your experiences as a trainer with your PC through regular communication channels so everyone can learn from each other as we find new ways to support ECE programs in their work helping children grow up healthy.

**Fidelity**

Although there is flexibility in the presentation style of the information, the key content and minimal time frame for each Learning Session should remain intact. You could certainly extend the training day in order to support additional activities, but we ask that you provide at least the six suggested hours of actual training for each Learning Session. If you want to make substantial changes to PPT presentations, please contact your PC or one of the ECELC staff listed on the *Who to Call for Help* chart on page 4.
Section 1.4 – Terms and Symbols Used in the Module Sections

These sections indicate important points to be presented, but how it is presented can be modified. Based on your experience as a Trainer, please feel free to use the language, ideas and experiences you feel will best convey the information to your audience.

This section provides guidance on how to set-up the room where you will conduct the Learning Session. The set-up can be adapted based on the actual venue for your Learning Sessions, but these sections outline important considerations. Additional information is also provided on videos or PPTs to set-up in preparation for your Learning Session.

Highlights the PPT, video or other resources that will be presented in the particular section of the Learning Session.

Indicates the video or media file that should be played.

Useful tips or reminders for Trainers leading the session, activity or discussion.

Indicates where an evaluation tool is used throughout the day.

Reminder to provide participants the opportunity to network and share ideas with each other throughout different sections of the Learning Session.
Section 2.1 – Tips for Fostering Collaborative Learning

**Build authentic relationships with participants**
At each Learning Session, greet participants warmly and help them feel welcome by creating an atmosphere in which they feel valued and comfortable. Set up interesting displays, interactive activities and opportunities for discovery learning. Take the time to get to know each provider and facilitate networking by introducing participants to one another.

**Know your role**
The Trainer can have a variety of roles during the Collaborative. Sometimes the Trainer will be the teacher, but other times the Trainer will be the facilitator as the teams teach one another about their successes, challenges or lessons learned. In addition to facilitating the Learning Sessions, Trainers will provide TA to the providers in the Learning Collaborative, helping to understand and prepare for the Action Period, keeping them focused on action planning and implementation, thinking through challenges, sharing helpful resources and validating their work.

**Create an interactive learning environment**
During the Learning Sessions, you will facilitate a wide range of experiences in addition to presentations: large and small group work, call and response, large group physical activity, report outs, breakout groups, video, and storyboard presentations by participants. Dividing large groups into smaller sub-groups allows for more individualized attention and relationship building. Many programs find that having a small, regular group to meet with provides a safe place to share experiences and ask questions. These experiences will encourage greater retention of subject matter, improve attitudes toward learning, and enhance interpersonal relations among group members and a wider network of support among colleagues.

**Use your skills and experience**
Providing examples from previous work with ECE and FCC programs will help build rapport and trust with Collaborative participants. As an expert, you will also be able to provide guidance for providers as they continue to grow and learn in the Collaborative.

**Make it easy for teams to share**
Develop simple ways for providers to share with each other – both at the Learning Sessions and during the Action Period. Inviting providers to share their successes in the opening segment of each Learning Session gets the day off to a great start. The use of KWL (Know, Want to know, Learn) Charts is an effective tool that can be used during Learning Sessions by Trainers to assess:

- What do participants **KNOW**?
- What do participants **WANT** to know?
- What did participants **LEARN** that is important to them?

As programs move into the action planning and implementation phase of the Collaborative, it can be helpful to provide a time for providers to ask questions and provide possible solutions for each other. Scheduling calls, check-ins, virtual updates or emails will allow teams to connect with each other, ask questions and provide updates that can be shared with the Collaborative.
Section 2.2 - Facilitating Adult Learning

An important element of effective facilitation with adult learners is understanding how adults learn—by incorporating discovery learning and collaborative approaches into the process of learning rather than a didactic approach. We know that adult learners are most engaged when the learning experience is active and the contributions between the facilitators and participants are balanced.

Adult approaches to learning

Malcolm Knowles, a leader in the field of adult education, developed a framework describing how adults learn differently than children. He defined six principles of adult learning:

1. Adults are internally motivated and self-directed;
2. Adults bring life experiences and knowledge to learning experiences;
3. Adults are goal oriented;
4. Adults are relevancy oriented;
5. Adults are practical; and
6. Adult learners like to be respected.

Learning environment

It is essential to create an environment that connects adult learning styles to the TSHS Curriculum content. The Learning Sessions are designed to facilitate a wide range of experiences to encourage discovery learning and construct a supportive network. Provide frequent opportunities for participants to explore and use the resources they will take back to their programs. If participants seem disengaged, review the six principles of adult learning to determine which area could be improved.

Important considerations related to the environment and principles of adult learning are as follows:

- The learning environment is characterized by physical comfort, mutual respect, trust and helpfulness, freedom of expression, and acceptance of differences.
- Provide physical conditions that are comfortable (seating, temperature, ventilation, lighting, decoration) and conducive to interaction (circle, small groups at round tables, interactive displays, opportunities for active play).
- Accept the learners as persons of worth and respect their feelings and ideas. They are curious about what the learners will bring to the sessions. Involve the participants in establishing a learning environment that makes them feel comfortable, engaged and productive.
- Build relationships among the learners by encouraging cooperative activities and conversations. Guide participants to explore differences and commonalities as they learn more about implementing best practices in their programs.

Strategies to support learning

Learning Sessions have been designed to facilitate and encourage all types of learners. Each session incorporates structure, creativity, reflection, small and large group work, movement/activity and practical exercises. Although varying pace and activity is important for engaging a variety of adult learners, the discussions and activities in each session support understanding and deeper knowledge, rather than merely being included to address a different learning style.
Be organized! Show enthusiasm!

The words, actions, and gestures of the Trainer all impact group dynamics. Participants are sensitive to a Trainer’s lack of interest or energy and may disengage. Conversely, enthusiasm and passion for a subject can lift a group, even one that is tired or lacking in motivation. A Trainer needs to be able to read the mood and temperament of a group and decide how to best keep participants engaged.

Consider the following responsibilities of effective Trainers:

- Be the guide, not the leader;
- Cultivate an atmosphere of respect;
- Recognize that FCC providers are accustomed to a playful, active atmosphere;
- Create a collaborative environment that values everyone’s contributions;
- Speak clearly and with enthusiasm;
- Build activities into your presentations;
- Build group curiosity and confidence;
- Guide and manage group interaction;
- Understand and respect cultural differences;
- Practice active listening, paraphrasing, observing, clarifying and elaborating;
- Use open-ended questions to stimulate conversation;
- Interpret verbal and non-verbal behavior cues;
- Be aware of group dynamics and adjust the agenda or activity to maintain engagement;
- Focus on achieving outcomes during Learning Sessions and when providing TA;
- Incorporate feedback when possible; and
- Have fun, bring a sense of humor and enjoy the new relationships you will establish and facilitate!
Section 2.3 – Train-the-Trainer Approach

Training and resources for the Taking Steps to Healthy Success (TSHS) curriculum and collaborative approach will be provided in a number of ways:

1. State/Locality Project Coordinators will be trained by the National ECELC Team on the Learning Session content and process (action planning and storyboards), the ECE program Action Tasks, evaluation methods/collection, and collaborative logistics prior to the launch of the Learning Collaboratives.

2. The National ECELC Team will prepare five (5) pre-recorded webinars pre-viewing the content and process for each respective Learning Session, to be used by the Project Coordinators to train their Trainers. This approach will provide Trainer fidelity and consistency to the Learning Session content, as well as flexibility to each state/locality regarding any content and/or facilitation method customization.

3. Project Coordinators will host a training prior to each Learning Session to train their Trainers on the Learning Session content, decided on a uniform approach for each respective Learning Session across the Collaboratives, and ensure that accurate information regarding health information, data interpretation, and state/locality-level early care and education practices and policies are correct.

4. The TSHS Implementation Guide and Learning Session content and materials will be made available prior to each Learning Session in two different formats: 1. Hardcopy (printed), and 2. On the Let’s Move! Child Care website www.healthykidshealthyfuture.org.

In addition, the following activities are encouraged to ensure all Trainers feel comfortable with the content, provide accurate information, and conduct highly engaging and effective group training that grounded in adult learning principles:

1. Trainers should be paired in teams which take into account their strengths and experiences. For example, a trainer with a lot of experience working in ECE programs should be paired with a partner more familiar with nutrition and child health.

2. Trainers should review the curriculum and Implementation Guide with questions directed towards their Project Coordinator and/or National ECELC Project team. See Who to Call for Help on page 4 of this guide.

3. Access online information and resources on children’s health, physical activity and breastfeeding to ensure a grasp of the information. Check out the Let’s Move! Child Care (LMCC) website (www.healthykidshealthyfuture.org) for information on best practices and related resources.

4. Observations of Trainers by the Project Coordinator to provide feedback and suggestions regarding activities flow of the material, information presented and audience engagement. The Project Coordinator should also meet with each Trainer team individually to review their plan and provide feedback, coaching and guidance.

5. Trainers can observe each other’s Learning Sessions to provide feedback and suggestions to each other regarding activities, flow of the material and audience engagement.

6. Trainers should regularly contact (on-site visits, observations, phone calls) their assigned ECE programs in order to make the curriculum relevant and practical.

7. Adults are internally motivated and self-directed. They bring life experiences and knowledge to learning experiences. Adults are goal and relevancy oriented. Adults are practical and like to be respected.
Section 3.1 – The Nuts and Bolts of the Learning Collaboratives Model

The National ECELC Project provides funding for two Trainers per Collaborative. Additional support may be secured from local agencies or organizations with shared goals (child care health consultants, quality rating and improvement system technical assistants, ECE professional development trainers, YMCA, universities, Cooperative Extension educators, etc). Past Collaboratives have successfully engaged partners to present specific content in the Learning Sessions; volunteers have also been utilized to help with set up and perform administrative tasks.

Each state/locality will run Collaboratives under the supervision and guidance of the PC. A Learning Collaborative will consist of 30 programs represented by the Family Child Care provider and any additional staff (as applicable). Each in-person Learning Session would ideally have a maximum of 75 participants.

Below is an overview of the Learning Collaborative Model, which consists of five in-person Learning Sessions and five Action Periods. Suggested scheduling for the Learning Sessions is as follows:

- LS1 to LS2  Approximately 8 weeks
- LS2 to LS3  Approximately 8 weeks
- LS3 to LS4  Approximately 8 weeks
- LS4 to LS5  Approximately 8 week

*Go NAP SACC is a Nutrition and Physical Activity Self Assessment for Child Care for ECE settings comparing their current practices with a set of best practices.
Section 3.2 – The Role of Trainers in Supporting Healthy Change

TA provided after Learning Sessions is key to helping FCC programs implement healthy change. Although participants may be inspired, informed and equipped to make changes by their discoveries and connections in the Learning Sessions, effective TA can help transform ideas into reality for their programs.

Trainers have a unique opportunity to get to know providers over the course of the Learning Collaborative. TA can take place in many different ways through: observation and debriefing, brainstorming, discussions, modeling, direct instruction, coaching, or mentoring. Effective Trainers select the appropriate approach to meet the needs of each individual provider while simultaneously focusing on the needs of each program, Trainers provide encouragement, support and a collaborative approach to action planning.

In a Learning Collaborative, Trainers lead small breakout discussion groups at each session to offer a safe space to share experiences, ask questions, connect with colleagues, and think together about next steps.

In addition to facilitating Learning Sessions, Trainers will provide TA to their FCC providers promptly after each Learning Session to ensure that they:

- Understand the Action Period tasks; and
- Have the information, support and resources they need.

A checklist for site visits after each Learning Session appears in Part 4: Content Implementation in the Action Period sections of this Implementation Guide. A TA form will help you track and manage the goals and implementation process of the providers that you and others support through TA. Please use the TA form to document every site visit or communication you have with your assigned provider. A sample TA form is shown on the following page.

After Learning Sessions

Each Action Period includes the facilitation of an abridged version of the previous Learning Session by the providers for staff, as well as specific tasks to complete (when applicable in Family Child Care programs).

The Action Period , takes approximately 1-2 hours. The Leadership Team Guide can be found in the Action Period section of each Learning Session Participant Handbook, along with accompanying worksheets, assessments, action plans and storyboard guidelines.

Trainers provide TA after Learning Sessions to support providers’ training and action tasks. They answer questions and connect them to resources, including other providers, when appropriate.

Tips for successful TA site visits:

- Begin with respect;
- Connect with the real interests, concerns and values of participants;
- Build relationships over time;
- Co-construct your visits by deciding together on the time, agenda, goals, preferred ways to communicate, etc.;
- Focus on changes that are within the program’s reach; and
- Choose appropriate strategies and varying degrees of assistance to help programs reach their goals.
Part 3: Planning and Timelines for Your Collaboratives

17.) Date of expected follow-up: / / 
18.) Mode of delivery for follow-up: [ ] On-site [ ] Phone [ ] Email [ ] Other (please specify): 
19.) Is the ECE Program’s Action Plan? [ ] Yes [ ] No [ ] Don’t Know 
20.) Please describe the ECE Program’s Action Plan: 
21.) Personal Information:

[ ] Practices
[ ] Education & Professional Development
[ ] Policy
[ ] Family Engagement
[ ] Staff Engagement

16.) Please describe the TA you provided in each AREA you have checked above: (use the back of this sheet if you need more space)

What did you help with?
Example: I observed teacher practices related to physical activity on the playground. I modeled ideas for active play.

What went well?
The children seemed to really have fun when the staff became more active with them.

What didn’t go well?
2 of the staff refused to engage in active play.

What additional help do they need with this?
I need to speak with the 2 staff members who refused to engage in activity with the children and engage them more.
Section 3.3 – Helping Leadership Teams Facilitate the Action Period

- Trainings could be scheduled in the evening or on a Saturday when the program will be closed. It may be helpful to schedule trainings during the week of a holiday;
- If ratios permit, staff could be scheduled off for 2-3 hours during the week of the training. Staff often appreciate having a longer lunch hour or being able to leave early one day;
- Regular staff meetings could be shortened or extended to accommodate ECELC training with program staff;
- Fun events could be prepared immediately before the training: a healthy meal at the center, a game or activity the staff especially enjoy, or a raffle. These activities encourage staff to arrive on time as well as create a fun atmosphere;
- Incentives encourage active participation in the training by creating coupons for staff to leave one hour early, come in one hour late or extend their lunch hour with required advance notice; and
- Training Sessions can be planned as part of professional development.

Section 3.4 – Helping Leadership Teams Develop S.M.A.R.T Goals

- Each provider should develop SMART goals to complete their Action Plan. Understanding how to write SMART goals will allow providers to develop a plan of change. Providers can use goal-setting as a way to make healthy changes and incorporate it into their daily planning.
- SMART goals are:
  - **Specific** – goals should state exactly what the providers would like to achieve. The goal should be specific enough to allow those involved in the process to understand it. Have providers think about the “who,” “what,” “when,” “where,” and “how” of their desired goal.
  - **Measureable** – goals should contain a way to determine if the goals have been reached. How will the program be assessed to recognize changes that have been made? How will programs identify the progress they are making? Goals can be measured by dates, number of tasks, and/or visual changes.
  - **Attainable** – goals should be reasonable that providers are able to achieve within a given time frame. Setting goals that are attainable increases motivation, and providers become confident that this is something that they can do. Encourage programs to think about goals based on what they currently have (i.e. resources, staffing etc.).
  - **Realistic** – goals should be something that can actually be met. Work with participants to set goals that they can handle. If a goal is too easy then the participants are not being challenged. Encourage programs to make changes that demonstrate their knowledge and ability to complete the task.
  - **Time-bound** – goals should have a deadline. Deadlines allow programs to identify their progress and hold themselves accountable to reach the deadline. In the Action Plan, participants are encouraged to enter a date of completion and designate somebody who is responsible for the action step.
- Introducing SMART goals through personal goal-setting is a good way for participants to understand how to develop these goals. Introduce it in a manner that may not be overwhelming or technical. A good way to introduce SMART goals is to have participants use a New Year’s resolution as their goal. This resolution can then be broken down to allow participants to see what SMART goals look like.
- When using personal goal-setting to introduce SMART goals, ensure that participants understand the connection between the personal SMART goals they developed and a SMART goal that can enhance their program practices.
Section 3.5- Helping ECE Program Staff Complete the Action Period Tasks

- Program classrooms may have a scheduled planning time when they do not have direct responsibility for children. Program staff can use this as an opportunity to brainstorm, plan, prepare materials, and document the process of change. This can be facilitated by regular “floaters,” program coordinators, administrative team members, or by creative use of nap time coverage (if your state permits different ratios during nap time).

- Encourage regular staff meetings when all program staff can meet, talk and plan as a group.

- Time to meet face-to-face is important, but developing additional communication channels that support continued planning, implementation and documentation after meetings is also key.

Section 3.6 – Learning Session Logistics

Room set-up
Learning Sessions consist of large group presentations, table discussions, technical assistance groups and physical activities to create a variety of learning experiences for participants. The ideal space for a Learning Session includes the following elements:

- A large main training room with space for round participant tables, food tables, beverages, and large group physical activities;
- A separate space near the entrance to the main training room for check-in and networking;
- Podium and projection screen; and
- Lighting that allows for dimming during screen presentations.

Technology considerations
Most Learning Sessions require technology:

- Laptop, speakers and LCD projector for the meeting spaces;
- CD player;
- Wireless microphones (one for the presenter and one or two for participants to share their ideas and thoughts with the group);
- Wi-Fi access (for accessing web-based video links); and
- Panel tables with microphones (if you choose to have a panel discussion for Learning Session(LS1) or any other sessions).

PowerPoint notes and slide show
When preparing for a Learning Session and giving a presentation, you can view the PPT with the presenter notes. The following directions are for PC users only, not Mac users. When you are ready to present:

- Open the PPT;
- At the top of the toolbar, click “Slide Show”;
- Click “Set Up Slide Show”;
- On the bottom right hand side, click “Show Presenter View”;
- Click “OK”;  
- Click “Slide Show”; and
- Click “From Beginning” to start your presentation.
Part 3: Planning and Timelines for Your Collaboratives

To print your PPT slides with the notes section:

- Open the PPT;
- At the top left hand side of the toolbar click the Microsoft Office Logo Button;
- Scroll down and click “Print”;
- On the lower left hand side find the drop down box “Print What”;
- Click “Notes Pages”; and
- Click “OK” to print.

Supplemental activities and resources

Within this guide, supplemental activities and resources are mentioned throughout the Learning Session Content Implementation section. Additional activities used throughout the Learning Sessions may include:

- **Raffle (optional)**: Used as an incentive to encourage participants to contribute their own thoughts and experiences throughout each Learning Session.

- **Know – Want to Know – Learned (KWL) Chart (optional)**: Create a KWL chart to help you communicate back and forth with participants—acknowledging what they are learning, weaving in new topics of interest, and answering questions. To create your chart, make 3 equal columns with the following headings:
  - What do we already KNOW?
  - What do we WANT to know?
  - What did we LEARN that is important to us?

- **Show and Tell (optional)**: Project Coordinators and/or Trainers can bring their favorite resources to each Learning Session to share with participants.
Planning Checklists
The planning checklists are a general guide for the different tasks needed to successfully launch Collaboratives. Feel free to add tasks, combine tasks, or change the timeline to fit your needs. Use the checklists to help you plan your training and ensure you’re ready for each Learning Session:

Two to three months prior to the initial Learning Session
❑ Determine dates for all five Learning Sessions;
❑ Identify and reserve an appropriate training venue;
❑ Identify publicity and social marketing opportunities;
❑ Determine how clock hours and/or CEUs can be provided for Leadership Team members and program staff. Submit application for approval, if required;
❑ Reach out to key partners who may want to present content at particular Learning Sessions;
❑ Begin recruiting FCC programs: discuss benefits, time commitment, incentives, etc.;
❑ Advertise the Learning Collaboratives to your target audience;
❑ Create a program interest list; and
❑ Distribute enrollment information.

Up to one month prior to the initial Learning Session
❑ Familiarize yourself with Learning Session content and materials;
❑ Order/obtain supplies and materials for use in the Learning Sessions;
❑ Create and laminate signs that provide direction and guidance to the presenters and participants at the Learning Session (e.g. “check-in,” “time is up” warning, “reserved” table tent…etc.);
❑ Create a logistics box: tape, scissors, markers, pens, folders, clipboards, index cards, first aid, post-its, signs, blank nametags, etc.;
❑ Select and meet with the lunch caterer. Place order for healthy food and beverages;
❑ Meet with training venue regarding technology requirements;
❑ Obtain raffle prize materials and raffle tickets (optional); and
❑ Secure commitments from trainers, interns, presenters, panelists (if using)…etc.

Two weeks before each Learning Session
❑ Send a reminder email to participants with Learning Session venue, date, time, directions…etc.;
❑ Create a pre-filled participant sign-in sheet (name and enrollment ID);
❑ Prepare name tags; and
❑ Send confirmation email to presenters with details regarding the venue / their segment.

One week before each Learning Session
❑ Confirm with the venue the date, time, space, food (where applicable) and audiovisual needs;
❑ Confirm final numbers with caterer;
❑ Save all electronic presentations on USB drives;
❑ Gather materials for the Learning Session; and
❑ Practice presentations.

After each Learning Session
❑ Allow for reflection and suggestions on how to improve the next Learning Session;
❑ Send thank you notes to speakers and panel participants;
❑ Send electronic thank you to participants with future dates, conference calls, TA visits, etc.; and
❑ Replenish logistics box as necessary.
Overview
LS1 provides a rationale for why change is necessary. It shows how early childhood nutrition, physical activity, screen time and breastfeeding practices support optimal health and address the alarming childhood obesity rates. The session focuses on increasing knowledge and awareness of healthy practices and their impact on young children. During the session, participants are expected to increase their knowledge, awareness and motivation to work towards healthy change. Key content includes:

- The powerful role of family child care providers as agents of change;
- Background information on childhood obesity prevention;
- ABC’s of a Healthy Me!
  - Reducing screen time
  - Healthy eating
  - Physical activity
  - Breastfeeding support
- Increasing teamwork through leadership, collaboration and support for personal wellness
- The process of making change: FCC providers will learn about best practices, conducting needs assessments and identifying strengths and areas for improvement.

Post-session (Action Period)
Providers will utilize the Leadership Team Guide to:

- Complete the Video Module 1 Worksheet
- Complete the Nutrition and Physical Activity Self-Assessment for Family Child Care (Go NAP SACC) instruments; and
- Identify specific strengths and improvement areas in their program.

Objectives
At the end of the Learning Session, participants will be able to:

1. Recognize two changes in our society that have contributed to an increase in childhood obesity;
2. Identify the benefits of implementing best practices for screen time, nutrition, physical activity and breastfeeding support through a review session;
3. Name at least two best practices for creating a family-friendly environment and reducing screen time; and
4. Complete the Go NAP SACC instruments to assess current FCC program practices and policies.
# Sample Agenda

The Agenda Template can be found on the *Let’s Move!* Child Care (LMCC) website: www.healthykidshealthyfuture.org. Feel free to use this as you customize the timing and activities for each Learning Session.

</tbody>
</table>
Check-In (30 min.)

**SET UP:**

Set up the night before if possible. If not, plan on setting up early the day of the training. Refer to the Materials List on page 25 for a complete list of what to set out or store for later. Set out sign-in sheets, nametags, and pens on tables near the main room entrance. In addition:

- Gather materials for physical activity breaks;
- Set up and test all technology: laptop, LCD projector, CD/DVD player (laptop may have this capability), and wireless microphone;
- Set up Show and Tell area (optional) to showcase important resources;
- Set up KWL Chart on large chart paper (optional); and
- Display raffle prizes (optional).

**CHECK-IN:**

It is recommended to begin check-in at least 30 minutes prior to Learning Session 1 (LS1). As participants sign-in, provide them with a LS1 Participant Handbook.

**TIPS:**

- Facilitate introductions and networking among participants; and
- Five minutes before start time, begin asking participants to find their seats.
PPT Part A – The ECELC Project (15 min.)

SET UP:
- Prepare PPT: The ECELC Project.

ACTION:
- Welcome participants;
- Introduce yourself with brief background information;
- Provide an overview of benefits (e.g. clock hours/CEUs, stipends, on site TA, etc.);
- Mention housekeeping items:
  - Bathroom location
  - Silencing cell phones
- Point out that each Learning Session will have its own Participant Handbook; and
- Provide an overview of the LS1 Participant Handbook and the agenda.

NETWORKING:
- Note: The ECELC Project provides a unique opportunity for professionals within early care and education settings to collaborate and learn from one another.
  - At this time encourage participants to introduce themselves to other providers.

TIPS:
- Assure participants that sessions will be fun, active and interactive;
- Point out that participant knowledge and experiences are valued and that there will be many opportunities to learn from each other; and
- It may be beneficial to go in to more detail about expectations and establish “ground rules” for the Learning Sessions.

PRESENT:
Introduction Slides and PPT Part A: The ECELC Project.

Video: U.S. First Lady Michelle Obama’s Welcome Message (5 min.)

PLAY:
U.S. First Lady Michelle Obama’s Welcome Message in PPT Part A: The ECELC Project.

Note: The PPT contains a prompt to play the U.S. First Lady Michelle Obama’s Welcome Message video. Click on the picture (hyperlink) to start the video.
Let’s Move! Child Care Registration and Quiz

**EVALUATION:**
- Distribute one LMCC registration and quiz to each provider;
- Explain that the LMCC quizzes will be registered and entered into the LMCC website database; and
- Allow providers to take the next 15 minutes to complete the registration form and LMCC quiz.

Sign up and make the commitment to promote nutrition and physical activity in your early care and education program. By signing up, you will:

- Get a Let’s Move! Child Care Participant Certificate
- Receive emails on the latest updates, resources, and ideas for promoting children’s health
- Be able to take the online, interactive Checklist Quiz to see which Let’s Move! Child Care goals you are meeting and which goals you need to work towards. The Quiz will help you create an Action Plan to reach the goals.

Please Note: We will not share any of your personal information. You can request to stop receiving emails from Let’s Move! Child Care at any time. To sign up, please fill in the information below. Required fields are marked with asterisks (*).

Please enter your Enrollment ID.*

*This number was included in your ECELC Welcome Letter. If you do not have an assigned Enrollment ID, please contact your State Project Coordinator.

First Name*

Last Name*

Name of program or organization*

City*

State*

Zip Code*

Are you an early care and education provider?*

- Yes
- No
Part 4: Content Implementation – Learning Session 1

How many children enrolled in your program are 5 years old or younger?*

Number of children = 

Thinking about the children in your care who are 5 years old or younger, which of the following ages do you serve?* Please select all that apply.

- Infants (0-12 months old)
- Toddlers (13-35 months old)
- Preschoolers (36-60 months old)

Is your program a center or is it home-based?*

- Center
- Home-based

Is your program any of the following? Please select all that apply.*

- Head Start
- Faith Based
- Military
- Native American/Tribal
- CACFP Participant
- None of the above

Does your program/home serve any meals or snacks during the day?*

- Yes
- No

Does your program/home serve beverages (milk, 100% juice, flavored drinks, etc.), not including water?

- Yes
- No

Does your program/home provide full day care or half day care?* For programs/homes that provide part time care that is neither full nor half day, please respond with the choice that is closest to what you provide.

- Full Day
- Half Day
## Let's Move! Child Care Checklist Quiz

The Let's Move! Child Care best practices are listed on the left. Please check the box under the statement that best describes your current situation.

PPT Part B – Healthy Development (30 min.)

**PRESENT:**
- PPT Part B: Healthy Development.

**PLAY:**

*Video Module 1*

*Note:* The PPT contains a prompt to play Video Module 1. Click on the picture (hyperlink) to start Video Module 1

**ACTION:**

- Explain that the content on the video is a summary of the key content presented at today’s Learning Session, including:
  - Ways ECE providers are key agents of change in early childhood environments;
  - Information regarding healthy child development;
  - CDC obesity statistics; and
  - Consequences of childhood obesity.
- Facilitate discussion.

**PRESENT:**
- The remaining slides of PPT Part B: Healthy Development.
PPT Part C – ABC’s of a Healthy Me! (30 min.)

PRESENT:

- PPT Part C: ABC’s of a Healthy Me!
  - The PPT contains an ABC’s of a Healthy Me (English and Spanish versions) and Be a Healthy Role Model for Children handouts.
  - The ABC’s of a Healthy Me and Be a Healthy Role Model for Children handouts can also be found on the next pages of this guide, in the LS1 Participant Handbook and on the Let’s Move! Child Care website (www.healthykidshealthyfuture.org).
ABC’s of a Healthy Me

A - Active play
  - Every day, inside and out

B - Breastfeeding
  - Support and access to a private space

C - Cut down on screen time
  - None for children under age 2
  - No more than 30 minutes a week for children ages 2 years and older

D - Drink milk and water
  - Offer milk at meals and make water always available to quench thirst

E - Eat healthy foods
  - Fruits, vegetables, whole grains, lean meats and protein, low-fat dairy

Funding for this publication was made possible by the Centers for Disease Control (CDC). Nemours is currently funded by the CDC under a five-year Cooperative Agreement (1U58DP004102) to support states in launching ECE learning collaboratives focused on obesity prevention. Its contents are solely the responsibility of the authors and do not necessarily represent the official views of the Department of Health and Human Services, Centers for Disease Control and Prevention, or the U.S. Government.
El ABC de una Persona Saludable

**A** mamantar
- Apoyo y acceso a un espacio privado

**B** eber leche y agua
- Ofrezca leche en las comidas y tenga siempre agua disponible para calmar la sed

**C** omer alimentos saludables
- Frutas, vegetales, granos integrales, carnes magras y proteína, lácteos bajos en grasas

**D** isminuir el tiempo frente a una pantalla
- Nada de tiempo para los niños menores de 2 años.
- No más de 30 minutos por semana para niños de 2 años en adelante.

**E** estimular el juego activo
- Todos los días, en espacios cerrados y al aire libre

Gracias al financiamiento de los Centros para el Control y la Prevención de Enfermedades (CDC), esta publicación pudo concretarse. Nemours está actualmente financiado por los CDC con un Acuerdo de Cooperación de cinco años (1U58DP004102) para respaldar a los estados que inician programas de colaboración de aprendizaje de ECE centrados en la prevención de la obesidad. El contenido es responsabilidad exclusiva de los autores y no representa necesariamente las opiniones oficiales del Departamento de Salud y Servicios Humanos, de los Centros para el Control y la Prevención de Enfermedades o del Gobierno de los Estados Unidos.
You are the most important influence on your child. You can do many things to help your children develop healthy eating habits for life. Offering a variety of foods helps children get the nutrients they need from every food group. They will also be more likely to try new foods and to like more foods. When children develop a taste for many types of foods, it’s easier to plan family meals. Cook together, eat together, talk together, and make mealtime a family time!

1. **show by example**
   Eat vegetables, fruits, and whole grains with meals or as snacks. Let your child see that you like to munch on raw vegetables.

2. **go food shopping together**
   Grocery shopping can teach your child about food and nutrition. Discuss where vegetables, fruits, grains, dairy, and protein foods come from. Let your children make healthy choices.

3. **get creative in the kitchen**
   Cut food into fun and easy shapes with cookie cutters. Name a food your child helps make. Serve “Janie’s Salad” or “Jackie’s Sweet Potatoes” for dinner. Encourage your child to invent new snacks. Make your own trail mixes from dry whole-grain, low-sugar cereal and dried fruit.

4. **offer the same foods for everyone**
   Stop being a “short-order cook” by making different dishes to please children. It’s easier to plan family meals when everyone eats the same foods.

5. **reward with attention, not food**
   Show your love with hugs and kisses. Comfort with hugs and talks. Choose not to offer sweets as rewards. It lets your child think sweets or dessert foods are better than other foods. When meals are not eaten, kids do not need “extras”—such as candy or cookies—as replacement foods.

6. **focus on each other at the table**
   Talk about fun and happy things at mealtime. Turn off the television. Take phone calls later. Try to make eating meals a stress-free time.

7. **listen to your child**
   If your child says he or she is hungry, offer a small, healthy snack—even if it is not a scheduled time to eat. Offer choices. Ask “Which would you like for dinner: broccoli or cauliflower?” instead of “Do you want broccoli for dinner?”

8. **limit screen time**
   Allow no more than 2 hours a day of screen time like TV and computer games. Get up and move during commercials to get some physical activity.

9. **encourage physical activity**
   Make physical activity fun for the whole family. Involve your children in the planning. Walk, run, and play with your child—instead of sitting on the sidelines. Set an example by being physically active and using safety gear, like bike helmets.

10. **be a good food role model**
    Try new foods yourself. Describe its taste, texture, and smell. Offer one new food at a time. Serve something your child likes along with the new food. Offer new foods at the beginning of a meal, when your child is very hungry. Avoid lecturing or forcing your child to eat.

Go to www.ChooseMyPlate.gov for more information.
Present:

Action:

- Inform participants that the Bringing Families Together: Building Community video they will watch is from Sheltering Arms Educare in Atlanta, Georgia. The video highlights the ECE providers’ experience with families and how they’ve been able to gain family support in their program; and
- Encourage participants to share the video with their program staff during the Action Period.

Play:

The PPT contains a prompt to play the Bringing Families Together: Building Community video. Click on the picture (hyperlink) to start the video.

Creating a Family-Friendly Environment Activity

Action:

- Have participants turn to the Creating a Family-Friendly Environment activity in their Participant Handbook;
- Ask participants to take about 10 minutes to individually review the best practices on the worksheet, noting the ones they already do and the ones they would like to do;
- Once the participants have completed the worksheet, ask them to take the next 10-15 minutes to discuss their thoughts with the participants at their table; and
- After the allotted time, ask for volunteers to share with the large group.
PPT Part E – Best Practices for Screen Time (15 min.)

**PRESENT:**
- PPT Part E: Best Practices for Screen Time

**ACTION:**
- Inform participants that the *Screen Free Moments: Promoting Healthy Habits* video they will watch is from the National Resource Center for Health and Safety in Child Care and Early Education. The video highlights ways providers can eliminate or reduce screen time in their programs.
- Encourage participants to share the video with their staff, (if applicable) or families during the Action Period.

**PLAY:**
- The PPT contains a prompt to play the *Screen Free Moments: Promoting Healthy Habits* video. Click on the picture (hyperlink) to start the video.
Part F – Facilitating Change in Your Program (45 min.)

PRESENT:

- PPT Part F: Facilitating Change in Your Program. Use the notes view of the PPT to guide your discussion.
- Discuss the Action Period and explain:
  - Participants’ role in modeling the change in their own program;
  - The Action Period is designed to help their program stay informed and involved in the process of healthy change;
  - Participants will facilitate a mini-version of today’s Learning Session with their staff (if applicable); and
  - Providers will identify strengths and improvement areas in their program.

Video: Making Health Easier: Healthy Changes Start in Preschool

ACTION:

- Explain that the Making Health Easier: Healthy Changes Start in Preschool video serves as an example of how to support healthy change.
  - The video is about a preschool teacher in Los Angeles Universal Preschool (LAUP) who changed her program to help her kids grow up healthy.
- Encourage participants to share the video with their program staff during the Action Period.

PLAY:

The PPT contains a prompt to play the Making Health Easier: Healthy Changes Start in Preschool video. Click on the picture (hyperlink) to start the video.

ACTION:

- Welcome participants;
- Explain that you will be their Trainer to help their providers become healthier by:
  - Working in groups during each Learning Session;
  - Assisting providers with making changes after Learning Sessions;
  - Conducting site visits to each provider after Learning Sessions;
  - Assisting providers with identifying and creating change in their facilities; and
  - Answering any questions throughout the process.
- Using the Afternoon Group Discussion Notes on the following page, discuss:
  - How providers can be powerful agents of change;
  - Why providers can support healthy change;
  - How to complete the Action Period for LS1;
  - What materials participants should bring back to LS2; and
  - Any questions participants may have.
Learning Session 1: Afternoon Group Discussion Notes

Facilitating Change In Your Program

Ask participants to turn to the Leadership Team Guide in the back of the Participant Handbook and follow along.

1. How and why are FCC providers powerful agents of change?

2. Why are FCC programs in a good position to support healthy change?

3. Discuss the “Action Period”: what you need to complete before the next Learning Session. All of the materials that you will need are in your Participant Handbook. We will have some time for questions and sharing ideas at the end. Together, let’s look at the action tasks step-by-step:

   a. **Task 1: Nutrition and Physical Activity Self-Assessment for Family Child Care (Go NAP SACC):** Following the instructions in the Leadership Team Guide, the provider will complete the Go NAP SACC instruments:
      1. Breastfeeding & Infant Feeding;
      2. Child Nutrition;
      3. Infant & Child Physical Activity;
      4. Outdoor Play & Learning; and
      5. Screen Time.

      The instruments will allow providers to reflect on the progress made with implementing the best practices.

      **Who should complete the Go NAP SACC instruments?**

      The provider will complete the instruments. If applicable, program staff can provide input if desired, but only one copy of each instrument should be turned in at Learning Session 2.

      **Which instruments should be completed?**

      - If a provider accepts infants, toddlers, and preschoolers, complete all five instruments.
      - If a provider does not accept infants, they do not need to complete the Breastfeeding & Infant Feeding instrument.

      **What should providers do upon completion of the instruments?**

      - Each provider should bring a copy of each completed instrument to Learning Session 2.

   b. **Task 2: Summary of five strengths and five improvement areas of the program.** The provider will list these items first on the Five Strengths and Five Improvement Areas worksheet found in the Leadership Team Guide in the Participant Handbook.

      1. It should be based on the provider’s findings from the Go NAP SACC instruments.
      2. The provider should hold on to the Five Strengths and Five Improvement Areas worksheet as this will help guide the Action Plan introduced in Learning Session 2.
4. Here is a list of what to bring back to Learning Session 2:
   a. *Go NAP SACC* instruments completed by the provider with input from program staff if (applicable);
   b. *Video Module 1 Discussion Worksheet* and;
   c. *Five Strengths and Improvement Areas* worksheet for the program.
   **Note:** Participants should make copies of the Action Period Tasks if they would like to have a copy for themselves. The Action Period tasks are collected at each Learning Session and might not be returned.

5. **What questions do you still have?**
Check-Out (15 min.)

**SET UP:**
- Set up any take-away materials assembly line style on the check-in tables;
- Provide a container for participants to drop off nametags;
- Provide a space or box to collect completed Feedback Forms; and
- Assign one person to highlight (or otherwise record) provider name on a list after Feedback Forms, if desired, after nametags are collected and take-away items are picked up.

**ACTION:**
- Remind everyone about next steps. When they get back to their programs, they need to:
  - Use the Go NAP SACC FCC instruments to learn about and assess their program;
  - Identify five strengths and five improvement areas; and
  - Bring back to LS2:
    - Video Module 1 Discussion Worksheet;
    - One copy of the Five Strengths and Five Improvement Areas worksheet; and
    - One copy of each completed Go NAP SACC instrument.

**ACTION:**
- Thank participants for being a part of the Learning Collaborative; and
- Request that participants drop their nametag in the container on the check-in table before leaving.

**ACTION:**
- Remind participants that the next Learning Session will be held on date: ________________; and
- Set aside 15 minutes to sit down with your co-trainer(s) and volunteers to discuss and record first thoughts about what went well and what could be improved for future sessions. You may also want to schedule a longer meeting at a later date.
LS1 Action Period:

Providers Should:

- Use Go NAP SACC instruments to learn about and assess their program;
- Complete the Video Module 1 Worksheet in the Leadership Team Guide; and
- Complete the Five Strengths and Improvement Areas Worksheet in the Leadership Team Guide
- Bring back to Learning Session 2:
  - Video Module 1 Discussion Worksheet
  - One copy of the Five Strengths and Improvement Areas Worksheet; and
  - One copy of each completed Go NAP SACC instrument

Technical Assistance

- Call providers to set up a convenient time to visit. Try to set up the visit for as soon after the Learning Session as you can, so that you can support them as they prepare to complete the Action Period tasks;
- Let the provider know how long you think the visit will take
- REMEMBER: Document your Technical Assistance visits on the TA Form; and
- Ask if there is anything that they especially want to focus on or have questions about.

During the visit:

- Learn more about the provider and the program. Tell them how excited you are to be working with them on this initiative;
- Ask what they thought about the Learning Session;
- Offer your assistance with Action Period tasks;
- Walk through the Leadership Team Guide in the LS1 Participant Handbook and help the provider understand how to use it;
- Walk through the Go NAP SACC instruments in the Leadership Team Guide of the LS1 Participant Handbook and help the provider understand how to use it;
- Review items they need to bring back to LS2;
- Remind providers to make a copy of the Go NAP SACC instruments to keep for their records since they will be turned in at Learning Session 1; and
- Ask if there is anything else they would like to talk about. Encourage them to reach out to you at any time. Be sure they have your contact information.
