National Early Care & Education Learning Collaboratives: 
Taking Steps to Healthy Success 
Learning Session 2, Family Child Care Edition 
Participant Handbook 
March 2016
Nemours is currently funded by the Centers for Disease Control and Prevention (CDC) under a five-year Cooperative Agreement (1U58DP004102) to support states in launching ECE learning collaboratives focused on obesity prevention. Funding for these materials and learning sessions was made possible by the CDC. The views expressed in written materials or publications, or by speakers and moderators do not necessarily reflect the official policies of the Department of Health and Human Services, nor does the mention of trade names, commercial practices, or organizations imply endorsement by the U.S. Government.
Welcome to **Taking Steps to Healthy Success**

An Early Care and Education Learning Collaborative (ECELC) to Promote Healthy Practices

Your Name: 
Program: 
My Contact for Technical Assistance: 

Nemours and its dedicated partners welcome you to the National Early Care and Education Learning Collaboratives (ECELC) Project! Nemours developed the model to support child care providers’ efforts to help young children grow up healthy and tested it with large early care and education programs in Delaware. We are excited to see it in action in your state!

Thanks to the commitment and generous funding from the Centers for Disease Control and Prevention (CDC), we are able to work together to adapt this powerful model for healthy change to meet the unique needs of your state. We are excited to support your work to create a healthier environment in your early care and education program for your children, your families and your program staff.

A Collaborative is a community of learners that will connect you with others engaged in making healthy change. It will offer learning opportunities, increase knowledge, create networks of support, and equip you to engage your staff in the process of making healthy changes. Over one year, the Collaborative will meet five times, with technical assistance visits scheduled between sessions to provide information, an opportunity to share experiences, and a forum for raising questions.

This toolkit is your guide to making change. It contains resources, tools and information to help you make the best practice and policy decisions for your program. Video training and materials will help staff and families understand the importance of making healthy changes and give them the tools to support your work. Small group work with a Trainer, and opportunities to share challenges and successes with others going through the process of change will give you a network to rely on for support, information and ideas.

This is a working toolkit that we will add to at each session. We hope you find the Learning Session materials useful. Thank you for joining us in this exciting work to help kids grow up healthy!

Acknowledgements

Nemours gratefully acknowledges the valuable contributions of a wide variety of stakeholders committed to supporting children’s health and optimal development. We thank you all for helping to make our dream a reality.

Thanks to generous funding support from the Centers for Disease Control and Prevention (CDC), we are able to work collaboratively with states to adapt the model to meet their unique needs. We welcome the opportunity to collaborate and learn with leaders and providers in participating states.

On behalf of the early care and education providers who will participate in the ECELC, and the children and families they serve, we thank our partners in this effort:

- Child Care Aware® of America
- National Initiative for Children’s Healthcare Quality
- Gretchen Swanson Center for Nutrition
- American Academy of Pediatrics
- National Association of Family Child Care
- American Heart Association, Dr. Mary Story (University of Minnesota)
- Dr. Dianne Ward (University of North Carolina)
- National Resource Center for Health and Safety in Child Care and Early Education
- American Public Human Services Association
- Association of State & Territorial Public Health Nutrition Directors
- United States Breastfeeding Committee
- Zero to Three

Special thanks to our Delaware Child Care Collaborative participants, who helped us develop, test and refine our original model. We learned so much from them, their children and families. Their commitment to promoting healthy eating and physical activity, their willingness to learn, their courage to change and their generosity in sharing their experiences continue to inspire us.

We are grateful to the Delaware Institute for Excellence in Early Childhood at the University of Delaware (DIEEC), our partner in implementing the second cohort of the Child Care Learning Collaboratives in Delaware, for their inspired collaboration.

The contribution of Elizabeth Walker, who guided the first collaborative in Delaware, is beyond measure. We are grateful to Elizabeth for sharing her vision, anchoring the collaborative in science and inspiring us all to change.

We thank the following individuals and organizations who contributed their expertise, materials and time to ensure success as we worked together to develop an empowering model for quality improvement in support of children’s health in child care settings:

- Child Care Exchange and Videoactive Productions: Roger Neugebauer and Dan Huber
- Delaware Child and Adult Care Food Program (CACFP): Beth Wetherbee and David Bowman
- Delaware Office of Child Care Licensing: Patti Quinn
- I am Moving, I am Learning: Linda Carson
- Parent Services Project
- Sesame Workshop
- Strengthening Families

Learning Session 2: Nurturing Healthy Eaters & Providing Healthy Beverages

Overview

Learning Session 2 provides a rationale for the role Family Child Care (FCC) providers play in helping make healthy changes. It explains healthy eating best practices in the FCC setting. The session focuses on increasing knowledge and awareness of healthy practices and their impact on young children. During this session, participants are expected to increase their knowledge, awareness and motivation to work towards healthy change. Key content includes:

- The importance of healthy environments to support healthy children;
- Best practices for healthy eating;
- Beginning the process of healthy change through an Action Plan;
- Developing objectives and action steps to support the provider and environment;
- Ways to support healthy eating through family engagement.

Post-session (Action Period)

The FCC provider will utilize the Leadership Team Guide to:

- Complete the Learning Session 2 Discussion Worksheet;
- Implement steps identified in the “provider” and “environment” columns of the Action Plan Worksheet; and
- Begin a storyboard documenting goals and healthy changes made throughout Learning Session 2 through Learning Session 5.
# Sample Agenda

## Objectives

At the end of the Learning Session, participants will be able to:

1. Describe best practices for healthy eating and identify at least one opportunity to make changes within their FCC program;
2. Name at least one tip to increase communication with families;
3. Begin creating an Action Plan and implement one or two changes in the area(s) of screen time, healthy eating, physical activity, and/or breastfeeding support; and
4. Begin documenting and communicating with families the process of healthy changes on a storyboard.

Objectives: Learning Session 2

At the end of the Learning Session, providers will be able to:

1. Describe best practices for healthy eating and identify at least one opportunity to make changes within their FCC program.

2. Name at least one tip to increase communication with families.

3. Begin creating an Action Plan implementing one or two changes in the area(s) of screen time, healthy eating, physical activity and/or breastfeeding support.

4. Begin documenting and communicating with families the process of healthy changes on a storyboard.
Part A
Healthy Environments

The Social Ecological Model
Healthy Environments

Eating
- Provide books, posters and toys reminding children of healthy food choices
- Role model healthy choices and eating habits

Breastfeeding
- Provide a quiet and relaxing space for breastfeeding mothers

Classroom Learning Activities
- Build nutrition education and physical activity into existing curriculum

Outdoor and Indoor
- Create a safe and open space for children to move

Home
- Use parent newsletters to encourage families to adopt healthy habits that are taught in the FCC program

Create a Healthy Eating Environment

When feeding young children
- Offer healthy choices: fruits and vegetables, whole grains and lean protein at every meal
- Model appropriate social behaviors and conversation during meals and snacks.
- Offer age-appropriate portion sizes consistent with CACFP guidelines
- Respond to hunger and feeding cues so children recognize them

Infants
- Encourage and support breastfeeding moms with access to a private space to feed or pump
- Feed infants on demand rather than on a fixed schedule so they learn to eat when they are hungry
Division of Responsibility in Feeding

Who is responsible, the child or the FCC provider?
1. Who decides what food will be served?
2. Who decides when food will be served?
3. Who decides where the food will be served?
4. Who decides how much food will be eaten?
5. Who decides whether or not a food is eaten?

Who is responsible, the infant or the FCC provider?
6. Who decides what food will be served?
7. Who decides when, where, how much and whether food is eaten?

Create a Healthy Learning Environment

Art, Music and Cooking
– Draw; Dance; Cook the veggies from the garden.

Physical Activity and Creative Play
– Structured Play: Move through the Farmer’s Garden

Literacy
– Use books that introduce healthy foods and model healthy eating habits

Math
– Count fruits and vegetables, sort by color or shape

Science
– Explore healthy food through senses (i.e. watch the growth of a potato, plant herbs and veggies in a garden)
Considerations for Healthy Eating

**Healthier options within food groups**
- Example: whole grains vs. refined grains; low-fat dairy vs. full-fat dairy

**Variety within food group**
- Example: rotate protein source with beans, fish, poultry, red meat, etc.

**How much (portion size)**

**How often (over the course of a week)**

**How it is prepared**
- Example: baked vs. fried
**Background Information**

**Dietary Guidelines for Americans**
- Updated every 5 years
- Developed for individuals age 2 and older
- Provides advice on how to maintain a healthy weight, reduce chronic disease and maintain overall good health

**Child and Adult Care Food Program (CACFP)**
- Used in Family Child Care settings
- Provides guidance for meal patterns and serving sizes
- Current guidelines are based on nutrition information from 1989
  - New recommendations are currently being reviewed and should be released soon. They will align with the Dietary Guidelines for Americans.

Farm to Preschool

What is farm to preschool?

Farm to preschool is an educational initiative of the farm-to-school model, which seeks to connect children with fresh fruits and vegetables through school meals, snacks, and classroom activities. The goal is to improve children’s health by teaching them about healthy eating habits and promoting the use of locally grown food.

Getting started:

Here are some tips to get started:

1. Introduce local foods into your menu:
   - Start small by incorporating a few local items into your meals.
   - Consider partnering with local farmers or schools to obtain fresh produce.
   - Use local foods in seasonal dishes and incorporate them into your menu planning.

2. Involve children in planning:
   - Involve children in the decision-making process by allowing them to choose local foods for their meals.
   - Encourage children to participate in the preparation of local foods and engage them in learning about healthy eating.

3. Educate parents:
   - Educate parents about the benefits of farm-to-school programs and how to incorporate local foods into their children’s diets at home.
   - Provide information about local food sources and encourage parents to support local farmers and schools.

4. Celebrate local foods:
   - Organize events or activities that celebrate local foods, such as farmer’s markets, cooking classes, or field trips to local farms.
   - Promote the use of local foods in recipes and meal plans.

FARM TO PRESCHOOL IN ACTION:

- Partnerships with local farms and schools
- Educational opportunities for children and families
- Community-driven initiatives
- Local food networks
- Collaboration with local businesses and organizations

Stay Informed:

- Visit the Farm to School website for more resources and information.
- Follow Farm to School on social media for updates and news.
- Contact your local extension office or agricultural department for assistance.

Farm to School is a project of the U.S. Department of Agriculture.

How Do National and State Best Practice Guidelines Support Your Work to Help Children Grow Up Healthy?

Physical Activity Break
Part C
Extending Your Learning to Staff and Families

Bringing It Home

Guide families by sharing lists of foods that present a variety of whole grains, fruits, vegetables, lean protein and low fat dairy.

Use MyPlate to help families categorize foods and prepare meals with a variety of nutrients.

When serving new foods in FCC, encourage families to do the same:

- Discuss the taste, smell and texture of the food.
- Offer a new food multiple times in a month so children become familiar.
Healthy Eating at Home

The American Academy of Pediatrics recommends that families can support healthier eating habits by:

- Encouraging children to eat five or more servings of fruits and vegetables each day
- Having healthy foods and beverages readily available and in plain sight on the kitchen table or counter or on the front of the shelf in the refrigerator
- Buying fewer sugar-sweetened beverages, high-calorie snacks and sweets
- Purchasing food for celebrations close to the event and storing the food immediately afterwards to avoid foodborne illnesses
- Having high-calorie foods less visible – wrapped in foil rather than clear wrap and placed in the back of the fridge or pantry

Partnering with Families

Get to know families and share expectations:

- Communicate nutrition policies when children enroll and regularly throughout the year to avoid conflict and confusion
- Provide written menus and ask for feedback
- Work together on feeding plan for children with allergies
- Accommodate vegetarian, vegan, religious and cultural diets
- Provide nutrition education for families throughout the year in addition to using teachable moments
- When introducing new foods at meals, encourage families to add that food to their home menus as well for consistency and exposure

Review
LS1 Action Period
How can you enhance your program environment to make it healthier?

Physical Activity Break
Part D
Facilitating Change in Your Program

Action Plan

Using the five areas of improvement identified from your Go NAP SACC results, choose 1-2 areas to work on.

Goals and action steps should include best practices and policies from at least one of the following areas:

- Healthy eating
- Healthy beverages
- Physical activity
- Screen time
- Breastfeeding support

Think about the Social Ecological Model to create and support lasting change.
Sample Goals

Children eat healthy food in the program:

– Revise menus over a 3 month period to align with best practices
– Engage children in weekly, planned activities to increase healthy eating and awareness of healthy habits
– Implement family-style dining

Children drink only healthy beverages in our program:

– Make water accessible to children throughout the day, inside and outside
– Serve only nonfat milk to children 2 years and older for all meals
– Stop serving juice and sugar sweetened beverages and encourage families to do the same

Sample Goals

Infants and children have more opportunities to engage in daily physical activity

– Infants experience supervised tummy time daily
– Preschoolers experience at least 120 minutes per day for and toddlers 60-90 minutes per day

Children do not experience passive screen time

– Remove televisions from program area
– Create an environment that encourages physical activity using proper equipment, music and structured physical activity

Breastfeeding mothers and babies are supported

– Develop policies and practices to encourage and support breastfeeding moms and babies
– Create a private space to breastfeed or pump
Healthy Fundraising and Celebrations

2-27
Facilitating Change in Your Program: LS2 Action Period

Facilitated by FCC Provider (if necessary)
- Training for FCC program staff
  - Mini-version of Learning Session 2

Opportunity to:
- Complete the Learning Session 2 Worksheet
- Identify the 1-2 areas your Action Plan will focus on
- Implement the Action Steps for Provider and Environment
- Begin a storyboard documenting healthy changes

Technical Assistance (TA)
- Assist in the development of an Action Plan
- Assist in the implementation of action steps for Provider and Environment
Creating a Storyboard

Programs will express their story of change by:

– Describing what change(s) were made and how they did it
– Sharing who was involved in the process
– Explaining accomplishments and challenges faced
– Sharing photos of the implementation process
– Describing how participants reacted to the change(s)
– Outlining any program policies that were updated as a result
– Explaining the next steps they will take to sustain the change(s)

Sample Storyboards
What’s Next?

Learning Session 3: Getting Kids Moving

Participants will bring

- Learning Session 2 Worksheet
- Action Plan Worksheet

Come dressed to move.
Wear comfortable shoes and clothing.

NOURISHING KIDS AND COMMUNITIES
The National Farm to School Network sprouted from the desire to support community-based food systems, strengthen family farms, and improve child health. Funded in part by the W.K. Kellogg Foundation, the Network coordinates, promotes and expands the Farm to School movement at the state, regional and national levels. The Network is a project of the Tides Center.

GETTING STARTED WITH FARM TO PRESCHOOL

What is farm to preschool?
Farm to preschool is a natural extension of the farm to school model, and works to connect early care and education settings (preschools, Head Start, center-based, programs in K-12 school districts, and family child care programs) to local food producers with the objectives of serving locally-grown, healthy foods to young children, improving child nutrition, and providing related educational opportunities.

Getting started
Farm to preschool offers multiple strategies to improve the health of children and communities. This list provides some easy first steps to develop a lasting farm to preschool program in your community:

1. Assess where you are and where you’d like to be.
   Are your goals centered on:
   • Purchasing local foods to be served in meals or snacks?
   • Establishing a garden?
   • Implementing other farm to preschool activities (field trips to farms or farmers’ markets, cooking lessons, etc.)?
   • Engaging families in local food access and education?
   • All of the above?

2. Form a team and collaborate:
   Teachers and administrators, parents, Child Care Resource and Referral staff, local farmers, community organizations, and even local colleges/universities can play important roles in establishing a sustainable farm to preschool program.

3. Establish one or two attainable goals to get started.
   Some ideas include:
   • Create a planning team that includes potential collaborators such as parents and teachers.
   • Identify snack or meal items that you would like to transition to local.
   • Find a farmer, farmers’ market, grocery store, or wholesaler to connect you to local foods. Ask your local Cooperative Extension (http://www.csrees.usda.gov/Extension/) for help making these connections!
   • Plan a local foods meal, snack, day, or event.
   • Reach out to a local nursery or hardware store for donations or other support for starting an edible garden.

FARM TO PRESCHOOL IN ACTION
Many programs exist across the country—here are two examples:

In-home providers create farm to preschool through a backyard garden
In Los Angeles, Ethan and Friends Family Child Care owner Shaunte Taylor has transformed her modest inner-city backyard to include raised beds, a compost bin, multiple fruit trees, and a chicken coop. Now, children plant seeds, amend the soil while investigating worms and insects, water plants, and harvest and prepare simple recipes using their garden produce.

Continued on other side....
WHY FARM TO PRESCHOOL?

HEALTH: Children & Families Win
One in five children in the U.S. is overweight or obese before entering kindergarten, and only 2 percent of children get the recommended serving of fruits and vegetables each day. Farm to preschool programs can increase children’s and families’ preferences for and consumption of fruits and vegetables.

AGRICULTURE: Farmers Win
Farm to preschool supports farming families by increasing market opportunities for small or mid-sized farmers, fishers, ranchers, food processors, and food manufacturers.

ECONOMY: Communities Win
Farm to preschool programs develop meaningful community relationships among early care settings, families, and local farmers. Money spent on local food stays within the local economy.

FARM TO PRESCHOOL IN ACTION
Oregon Child Development Coalition works directly with local farmers to procure food for meals
Early care centers have proven to be an ideal market for La Esperanza Farm, an incubator farm for local organic and sustainable Latino farmers in Forest Grove, Oregon. Working closely with the Oregon Child Development Coalition’s USDA Food Services Specialist, Head Start centers now receive deliveries of local produce for meals, nourishing both children and their community.

Promote farm to preschool in your community.
Ideas include sharing information and recipes in parent newsletters, posting garden or field trip photos to a web or social media site, or inviting local media to your activities.

School districts versus early care settings
There are a few important distinctions between school districts and early care settings:

- **Local foods procurement:** Preschools and family child care programs tend to purchase at smaller volume and generally do not offer a la carte choices or multiple meal options. Small purchasing volumes can be a good fit for small farmers who may not have enough volume to work with an entire school district.
- **Class size:** Preschools and family child care programs tend to have smaller numbers of children, and their schedules can vary (child care might be for only a few hours, or it could be up to half or full days). Smaller groups of children provide greater flexibility, while shorter days can limit some activities.
- **Curriculum:** Common Core is the standard for K-12, while experiential education is highly encouraged in preschool. This is a great fit with many farm to preschool activities such as gardening, cooking, and taste tests.
- **Parental involvement:** Parental involvement tends to be strong during the preschool years, which can be a huge asset for farm to preschool programming.

Healthy Fundraising

Fundraising is a necessary activity for many early care and education providers to help support quality programming. Most organizations are accustomed to selling food, mostly unhealthy food, to raise money. But there are many other healthy, easy, fun and profitable options to choose from! If your program participates in fundraising, choose to support healthy choices by selling non-food items or foods that meet best practice.

Why are junk food sales not recommended?
Early care and education providers and staff have a responsibility to promote and support healthy behaviors. While you may teach children about the benefits of healthy eating, and serve nutritious meals and snacks, using unhealthy foods as fundraising items sends a confusing message and makes it harder for children and families to make healthy choices.

Will we make any money if we sell only non-food items?
Many factors will affect the profitability of your fundraiser and should be considered when deciding on the best items to sell or events to organize. Some of these include: cost of product, community involvement, time of year/weather, and the amount of effort required by the staff, families and children at your program. Many organizations throughout the county have moved toward “healthy” fundraising options and have maintained positive profit margins.

Sample Policy Statements:
While creating program policies on fundraising isn’t always required, policies do help staff and parents understand the importance of a “rule.” Consider these sample policies:

1. Our program chooses fundraising activities that promote non-food items and/or physical activity and does not participate in fundraisers that involve unhealthy foods or beverages.
2. If our program has fundraising activities that involve food and/or beverages, we permit only foods that meet best practice.

Healthy Celebrations

Holidays and celebrations are exciting and special moments in children’s lives! ECE programs can support healthy habits by celebrating events in a healthy way. As children grow, they begin to learn the significance of celebrations and holidays. The earlier children learn to celebrate in a healthy way, the easier it is to convince them that healthy celebrations can be fun. Older children may be more skeptical of changes to celebrations, so make changes slowly and explain to them why celebrating in a healthy way is important. Here are some suggestions to help plan a fun and healthy celebration:

General Tips

- Celebrate holidays in ways that don’t focus on food: sing songs, play games or do an art project.
- Encourage children to help you make a special, healthy treat.
- Think of healthy alternatives to traditional party foods such as fruit kebabs, pita pizza or mini muffins instead of a large cake. If you feel strongly about having a traditional treat, make healthy substitutions (e.g., substitute unsweetened applesauce for oil in cakes, cupcakes, breads and muffins).
- If you provide favors for birthdays or small gifts for holidays, try small age-appropriate toys like stickers, crayons, modeling dough or trading cards instead of sweets.
- Make a piñata for the class and fill it with small favors (e.g., crayons, stickers, temporary tattoos, scarves or small, age-appropriate small favors) instead of candy.

Suggestions for Healthy Celebration Foods

- Fruit smoothies (blend ice, fresh or frozen fruit, fat-free yogurt, and fat-free milk)
- Birthday kabobs (use a straw instead of a sharp stick) with any kind of fruit
- Small low-fat oatmeal cookies or whole grain fig cookies
- Prepare one of the children’s favorite dishes (in a healthy way) and serve snack-size portions for the class.
- 100% fruit juice freezer pops
- Fruit pizzas using whole grain tortillas topped with low-fat whipped cream and fruit
- Make ice cream cone cakes. Fill ice cream cones with pudding (made with fat-free milk) and decorate with sprinkles.
- Make-your-own pizzas using whole grain English muffins and veggie toppings.
- Mini cupcakes or muffins (decreasing portion size is good, too!)

Nemours is currently funded by the Centers for Disease Control and Prevention (CDC) under a five-year Cooperative Agreement (U58DP004102-01) to support states/localities in launching early care and education learning collaboratives focused on childhood obesity prevention. The views expressed in written materials or publications, or by speakers and moderators do not necessarily reflect the official policies of the Department of Health and Human Services, nor does the mention of trade names, commercial practices, or organizations imply endorsement by the U.S. Government.
Suggestions for Healthy Foods for Celebrations:

<table>
<thead>
<tr>
<th>8 - 12 Months</th>
<th>1 - 6 Years</th>
<th>6 - 12 years</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Pureed or soft fruits and vegetables cut into ¼ inch cubes</td>
<td>• Fresh, frozen or canned fruits and vegetables cut into small pieces</td>
<td>• Fresh, frozen or canned fruits and vegetables</td>
</tr>
<tr>
<td>• Whole grain crackers</td>
<td>• Whole grain crackers</td>
<td>• Whole grain crackers</td>
</tr>
<tr>
<td>• Shredded or cubed ¼ inch natural cheese</td>
<td>• Low-fat cheese cubes or string cheese</td>
<td>• Cheese cubes or string cheese</td>
</tr>
<tr>
<td>• Plain yogurt (made with whole milk)</td>
<td>• Low-fat or fat-free yogurt</td>
<td>• Low-fat or fat-free yogurt</td>
</tr>
<tr>
<td>• Water, formula or breast milk</td>
<td>• Water or milk (following age recommendations)</td>
<td>• Water, 1% (low-fat) or fat-free milk, 100% juice</td>
</tr>
</tbody>
</table>

Healthy Ways to Celebrate:

• Allow children to help plan activities and a healthy menu to complement the celebration.
• Serve healthy foods that are the holiday’s traditional colors. For example, serve cantaloupe, pumpernickel bread and low-fat cheddar cheese balls at a Halloween party, or vanilla yogurt with blueberries for Hanukkah.
• Decorate using fun holiday centerpieces made out of fruits and vegetables.
• Pass out party favors that promote physical activity (e.g., jump ropes, balls or Frisbees®).
• Plan parties at locations that encourage physical activity, such as a local park, pool or playground.
• Honor the birthday boy or girl with treats other than food, such as allowing them to choose a game or special activity or letting them wear a special crown, sash or badge on their birthday.
• Let children choose a favorite book to read to the class or a favorite physical activity.
• Take a field trip or walk to a fun new destination.
• Host a treasure hunt around the early care and education program, playground or neighborhood.

Nemours is currently funded by the Centers for Disease Control and Prevention (CDC) under a five-year Cooperative Agreement (1US8DP004102-01) to support states/localities in launching early care and education learning collaboratives focused on childhood obesity prevention. Learning Session 2: Nurturing Healthy Eaters & Providing Healthy Beverages

Leadership Team Guide

Name: ____________________________________________________________________________________

Program: ___________________________________________________________________________________

Learning Session 2: Action Period

Complete before Learning Session 3 (LS3):

☐ Begin to implement changes in the areas of “provider” and “environment.”

☐ Use the Building Relationships with Families handout to complete the Learning Session 2 Discussion Worksheet.

☐ Begin a storyboard to document and communicate healthy changes in your program

☐ Bring the following items back to Learning Session 3:
  – Learning Session 2 Discussion Worksheet
  – Action Plan Worksheet

Setting the Stage

Supplies:

• Action Plan Worksheet;
• Summary of five strengths / five improvement areas from LS1 Action Period;
• Building Relationships with Families handout;
• Learning Session 2 Discussion Worksheet;
• Pens or pencils for writing.
Environment

Tips for creating a supportive and fun environment for making change:

- Be organized. Bring all needed materials and plan ahead
- When applicable share ideas with staff and families be open to suggestions. During discussions, encourage staff and families to participate, listen carefully to their ideas, record them and be willing to share your ideas too; and
- Have fun! Make this a time to brainstorm and build your program to make it healthier and better.

Engaging staff in discussion

To help engage families in discussion, try these discussion prompts and ideas:

- Encourage families to take the lead on sharing their ideas;
- Validate their ideas by recording them and responding positively; and
- Try to use open-ended questions to encourage conversation:
  - How can we use what we discussed to create change in our program?
  - How could we further engage families in our program?
  - What would you like to learn more about?
Task 1: Action Plan

What is Our Role in Making Healthy Changes?

The Action Plan and next steps:

- Based on your ideas and five improvement areas identified in the Learning Session 1 Action Period, create an Action Plan;
- Using the *Action Plan Worksheet*, decide on 1-2 areas you want to work on;
- Complete the “provider” and “environment” columns on the *Action Plan Worksheet*. Use the sample *Action Plan Worksheet* on the following page as a guide; and
- Work to implement changes in the areas of “provider” and “environment.”

Task 2: Learning Session 2 Group Discussion Worksheet

Building Relationships with Families Handout

- Review the best practices listed on the Building Relationships with Families handout found on the following page; and
- Complete the Learning Session 2 Discussion Worksheet.

Building Relationships with Families through Healthy Eating

- As you communicate healthy eating strategies get to know your families and shared expectations. Families can support your established healthy eating practices at home;
- Communicate your nutrition policies during enrollment and throughout the year. This provides families with an understanding of what is going on in the child’s program;
- Accommodate varying diets and eating practices. This builds relationships with families because they feel as though they are accepted and their practices are being taken into consideration; and
- Inform families about new foods being introduced to the children during the day. This will give them a sense of foods their children may like.
Learning Session 2: Action Period

Building Relationships with Families

Review the best practices for building relationship with families listed below. Consider your own experiences with each practice, and complete the Learning Session 2 Discussion Worksheet on the following page.

Learning Session 2: Action Period

Learning Session 2 Group Discussion Worksheet

1. As you begin working on your Action Plan, which two (2) best practices for building relationships with families do you feel are most important in order for your FCC program to make healthy changes?

____________________________________________________________________________________________

____________________________________________________________________________________________

____________________________________________________________________________________________

____________________________________________________________________________________________

2. What challenges might you face when implementing healthy eating best practices and building relationships with families?

____________________________________________________________________________________________

____________________________________________________________________________________________

____________________________________________________________________________________________

____________________________________________________________________________________________

3. What resources do you need in order to be successful with implementing these best practices?

____________________________________________________________________________________________

____________________________________________________________________________________________

____________________________________________________________________________________________

____________________________________________________________________________________________
Task 3: Starting Your Storyboard

Telling Your Story of Change

As you go through the process of making healthy changes it is important to document your successes you are making. Each Learning Session will prepare you to complete a final storyboard for Learning Session 5. This storyboard will reflect the changes that you are making from the goals selected on your Action Plan Worksheet.

- Create a storyboard to share your story of healthy change with colleagues, staff, children and families.
  - Your FCC program will use a tri-fold storyboard to document and communicate the implementation of the Action Plan and the process of change in your program.
  - Create your storyboard by:
    - Describing what change(s) were made and how you did it;
    - Sharing who was involved in the process;
    - Explaining accomplishments and challenges faced;
    - Sharing photos of the implementation process;
    - Describing how staff, children, and families reacted to the change(s);
    - Outlining any program policies that were updated as a result; and
    - Explaining the next steps you will take to sustain the change(s).
  - You can choose a variety of ways to express your story of change. This includes:
    - Photos of the process including before, during and after the change(s);
    - Anecdotes from staff, families and children;
    - Assessments, observations and reflections;
    - Documents including lesson plans or menus that demonstrate changes; and/or
    - Children’s artwork that describe the healthy changes in the program.
  - Display the boards in your program as you are working on them so that children, families and staff can see and learn what is going on through your efforts to make your program healthier.

Bring the storyboards to Learning Session 5!
